Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Officer's Responsibilities and Approval

The accounting officers are required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and are responsible for the content and integrity of the consolidated annual financial statements and related financial information included in this report. It is the responsibility of the accounting officers to ensure that the consolidated annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the consolidated annual financial statements and was given unrestricted access to all financial records and related data.

The consolidated annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The consolidated annual financial statements are based upon appropriate accounting policies consistently applied, unless included in note 2, and supported by reasonable and prudent judgements and estimates.

The accounting officers acknowledge that they are ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officers to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is responsible for the preparation of these consolidated annual financial statements in terms of Section 126(1) of the Municipal Finance Management Act, (Act 56 of 2003), and has signed on behalf of the entity.

The accounting officer certifies that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 42 of these consolidated annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Office Bearers Act, (Act 20 of 1998) and the Minister of Provincial and Local Government's determination in accordance with this Act.

The accounting officers are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the consolidated annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officers have reviewed the municipality's cash flow forecast for the year to 30 June 2022 and, in the light of this review and the current financial position, they are satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's external auditors to express an independent opinion on the fair presentation of the consolidated annual financial statements.

The external auditors are responsible for independently reviewing and reporting on the municipality's consolidated annual financial statements.

The consolidated annual financial statements set out on pages 6 to 130, which have been prepared on the going concern basis, were approved by the accounting officer on 30 September 2021 and were signed:

Acting Accounting Officer
S. More

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Officer's Report

The accounting officers submit their report for the year ended 30 June 2021.

1. Review of activities

Main business and operations

Net surplus of the municipality was R 7 106 063 (2020: surplus R 229 931 580).

2. Going concern

I draw attention to the fact that at 30 June 2021, the municipality had an accumulated surplus of R 13 112 490 182 and that the municipality's total assets exceed its liabilities by R 18 200 735 162.

The consolidated annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business. Refer to note 60 for further details.

The entity still has the power to levy rates and taxes and it will continue to receive funding from government as evident from the equitable share allocation in terms of the Division of Revenue Act, (Act 4 of 2020).

3. Subsequent events

The following subsequent events transpired after the reporting date and before the annual financial statements were authorised for issue:

- 1) Cllr M Nkoane was appointed as new Speaker of the Municipal council.
- 2) The former Speaker, Cllr M Siyonzane was appointed as the new Executive Mayor.
- 3) On the 4th of June 2021, there was a council resolution for the determination of a new sale of business agreement between the Centlec and Municipality. The agreement was to be implemented within 21 days however based on the legal and accounting implications, Council resolved to defer the implementation financial period of the resolution from 2020/21 to 2022/23 financial period.

4. Accounting Officers' interest in contracts

None.

5. Accounting Officer

The accounting officers of the municipality during the year and to the date of this report are as follows:

Name	Nationality	Changes
Adv TB Mea	South African	Accounting Officer until 21 May 2021
S. More	South African	Current Acting Accounting Officer from 30 July 2021
T. Maine	South African	Acting Accounting Officer from 21 May 2021 until 30 July 2021

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1. Presentation of Consolidated Annual Financial Statements

The consolidated annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These consolidated annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these consolidated annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period, except for the changes set out in note Changes in accounting policy.

1.1 Going concern assumption

These consolidated annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the consolidated annual financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.3 Consolidation

Basis of consolidation

Consolidated consolidated annual financial statements are the consolidated annual financial statements of the municipality and its municipal entity presented as those of a single entity.

The consolidated annual financial statements incorporate the consolidated annual financial statements of the controlling entity and all controlled entity, including special purpose entities, which are controlled by the controlling entity.

Consolidated consolidated annual financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances.

Control exists when the controlling entity has the power to govern the financial and operating policies of another entity so as to obtain benefits from its activities.

The revenue and expenses of a controlled entity are included in the consolidated annual financial statements from the transfer date or acquisition date as defined in the Standards of GRAP on Transfer of functions between entities under common control or Transfer of functions between entities not under common control. The revenue and expenses of the controlled entity are based on the values of the assets and liabilities recognised in the controlling entity's consolidated annual financial statements at the acquisition date.

The consolidated annual financial statements of the controlling entity and its controlled entities used in the preparation of the consolidated annual financial statements are prepared as of the same date.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.3 Consolidation (continued)

When the end of the reporting dates of the controlling entity is different from that of a controlled entity, the controlled entity prepares, for consolidation purposes, additional consolidated annual financial statements as of the same date as the consolidated annual financial statements of the controlling entity unless it is impracticable to do so. When the consolidated annual financial statements of a controlled entity used in the preparation of consolidated annual financial statements are prepared as of a date different from that of the controlling entity, adjustments are made for the effects of significant transactions or events that occur between that date and the date of the controlling entity's consolidated annual financial statements. In any case, the difference between the end of the reporting date of the controlled entity and that of the controlling entity is no more than three months. The length of the reporting periods and any difference between the ends of the reporting dates is the same from period to period.

Adjustments are made when necessary to the consolidated annual financial statements of the controlled entities to bring their accounting policies in line with those of the controlling entity.

All intra-entity transactions, balances, revenues and expenses are eliminated in full on consolidation.

Non-controlling interest in the net assets of the municipality is identified and recognised separately from the controlling entity's interest therein, and are recognised within net assets.

Changes in a controlling entity's ownership interest in a controlled entity that do not result in a loss of control are accounted for as transactions that affect net assets.

A Special purpose entity is consolidated when the substance of the relationship between the municipality and the Special purpose entity indicates that the Special purpose entity is controlled by the municipality.

1.4 Significant judgements and sources of estimation uncertainty

In preparing the consolidated annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the consolidated annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the consolidated annual financial statements. Significant judgements include:

Trade receivables, loans and other receivables

The municipality assesses its trade receivables, loans and other receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the entity makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

Where the impairment for trade receivables, loans and other receivables is calculated on a portfolio basis, these are based on historical loss ratios. These annual loss ratios are applied to the balances in the portfolio. The impairment is measured as the difference between the receivables' carrying amount and the present value of the estimated future cash flows discounted at the effective interest rate, computed at initial recognition. The impairment loss is recognised in surplus or deficit when there is objective evidence that it is impaired.

Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the statement of financial performance.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of investment property is determined on the basis of a valuation by an independent valuer who holds a recognised and relevant professional qualification and has recent experience in the location and category of the investment property being valued.

The fair value of items of land and buildings is determined from market-based evidence by appraisal. An appraisal of the value of the asset is undertaken by a member of the valuation profession, who holds a recognised and relevant professional qualification.

The fair value of heritage assets is the price at which the heritage asset could be exchanged between knowledgeable, willing parties in an arm's length transaction. The fair value of heritage assets is determined from market-based evidence determined by appraisal. An appraisal of the value of the asset is normally undertaken by a member of the valuation profession, who holds a recognised and relevant professional qualification.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. The recoverable service amount of non-cash-generating assets have been determined on the higher of value-in-use calculations and fair value less cost to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including production estimates, supply demand, together with economic factors such as exchange rates, inflation rates and interest rates.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 22 - Provisions.

Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The municipality recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The municipality recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the municipality to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the municipality to realise the net deferred tax assets recorded at the end of the reporting period could be impacted.

Useful lives and residual values

The entity's management determines the estimated useful lives and related depreciation charges for assets as noted in accounting policies 1.8 and 1.6. These estimates are based on industry norm.

Management will increase the depreciation charge prospectively where useful lives are less than previously estimated useful lives. Management will decrease the depreciation charge prospectively where useful lives are more than previously estimated useful lives.

Where changes are made to the estimated residual lives, management also makes these changes prospectively.

Employee benefit obligations

The present value of the post-retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post-retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 23.

1.5 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.5 Investment property (continued)

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Cost is the amount of cash or cash equivalents or the fair value of the consideration given to acquire an asset at the time of its acquisition or construction. Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

Although unlikely, if the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Derecognition

Items of investment property are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use or disposal of the asset.

The gain or loss arising from the derecognition of an item of investment property is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of investment property is determined as the difference between the net disposal proceeds and the carrying amount of the asset.

The municipality discloses relevant information relating to assets under construction or development, in the notes to the consolidated annual financial statements (refer to note 9).

1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others (other than investment property), or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.6 Property, plant and equipment (continued)

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent measurement

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for X,X and X which is carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to the revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to the revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to accumulated surplus as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Depreciation and impairment

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Land, except for landfill and quarry sites, is not depreciated as it has an indefinite useful life.

Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent to initial recognition, property, plant and equipment on the cost model is carried at cost less accumulated depreciation and any accumulated impairment losses. Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life (years)
Buildings	Straight line	30 - 60
Landfill sites	Straight line	20 - 69

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.6 Property, plant and equipment (continued)

Fire arms	Straight line	5 - 40
Environmental facilities	Straight line	5 - 50
Quarries	Straight line	20 - 30
Roads and stormwater	Straight line	3 - 100
Equipment under finance lease	Straight line	3 - 5
Community / Recreational	Straight line	10 - 30
Sewerage and mains	Straight line	10 - 60
Water network	Straight line	5 - 100
Security	Straight line	10
Housing	Straight line	30 - 60
Other vehicles	Straight line	5 - 20
Other assets	Straight line	3 - 20

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Compensation from third parties for items of property, plant and equipment that were impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Derecognition

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the consolidated annual financial statements (refer to note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the consolidated annual financial statements (refer to note 10).

1.7 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.8 Intangible assets

An intangible asset is an identifiable non-monetary asset without physical substance.

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Subsequent measurement

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation begins when intangible assets are in the location and condition necessary for it to be capable of operating in the manner intended by management and ceases at the date that the asset is derecognised.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software	Straight line	3 - 30
Servitudes		Indefinite

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (refer to note 11).

Derecognition

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.9 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.9 Heritage assets (continued)

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets, whose fair value can be measured reliably, is carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase is credited directly to the revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Compensation from third parties for items of heritage assets property that were impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

The entity separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (refer to note 12).

The entity discloses relevant information relating to assets under construction or development, in the notes to the financial statements (refer to note 12).

1.10 Investments in controlled entities

Investments in controlled entities are carried at cost less any accumulated impairment.

The cost of an investment in a controlled entity is the aggregate of:
the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the entity;
plus
any costs directly attributable to the purchase of the controlled entity.

1.11 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Financial instruments (continued)

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Financial instruments (continued)

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- contingent consideration of an acquirer in a transfer of functions between entities not under common control to which the Standard of GRAP on Transfer of Functions Between Entities Not Under Common Control (GRAP 106) applies
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Classification

The entity has the following types of financial instruments (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

- Financial instruments measured at fair value;
- Financial instruments measured at amortised cost;
- Financial instruments measured at cost.

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus, in the case of a financial instrument not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, an municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the entity cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the entity reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Financial instruments (continued)

The entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

The entity assess financial assets individually, when assets are individually significant, and individually or collectively for financial assets that are not individually significant. Where no objective evidence of impairment exists for an individually assessed asset (whether individually significant or not), an entity includes the assets in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised, are not included in the collective assessment of impairment.

For collective assessments of impairment, assets with similar credit risk characteristics are grouped together. The credit risk characteristics are indicative of the debtors' ability to pay all amounts due according to the contractual terms.

In making this assessment management may consider the following indicators as guidance for possible impairment:

- Significant financial difficulty experienced by the borrower/debtor;
- Delays in payments (including interest payments) or failure to pay/defaults;
- For economic or legal reasons, allowing disadvantaged customers who are experiencing financial difficulties to pay as and when they can. The entity would not otherwise have considered this concession. For example, allowing disadvantaged customers to pay their account when they can due to the fact that the water it supplies to the customer is a basic human right;
- It is probable that the borrower/debtor will enter sequestration (bankruptcy) or other financial reorganisation;
- The disappearance of an active market for the financial asset because of financial difficulties
- Observable data, for example historical data, indicating that there is a decrease in the estimated future cash flows that will be received (which can be measured reliably), from a group of financial assets (financial assets with similar credit risk characteristics grouped together) since the initial recognition of those assets. The decrease may not yet be identified for the individual financial assets in the group. These can include:
 - the payment status of borrowers/debtors in the group has deteriorated (e.g. an increased number of delayed payments);
 - or
 - national or local economic conditions that are in line with non-payments in the group (e.g. an increase in the unemployment rate in the geographical area of the borrowers/debtors, or adverse changes in market conditions that affect the borrowers/debtors in the group)
- Accounts in arrears for a period longer than the initial estimated repayment period;
- Accounts with arrears of over 90 days showing no repayments in the last financial year;
- Accounts handed over for collection;
- Any negative changes in the ability of debtors and borrowers to repay the amounts due to the entity (e.g. an increased number of late payments);
- A breach in contract, such as a default in interest or capital payments.

Management need not utilize all the indicators given above as guidance but only use the indicators to which management has sufficient information to make the assessment for possible or actual impairment.

Refer to notes 4, 5, 6 and 7 for the impact of the above application.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Financial instruments (continued)

Derecognition

Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognises either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the entity has retained substantially all the risks and rewards of ownership of the transferred asset, the entity continues to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the entity recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.11 Financial instruments (continued)

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

1.12 Statutory receivables

Transitional provisions

GRAP 108 Statutory receivables became effective on 1 April 2019 and, in accordance with the transitional provisions for the standard provided in Directive 3, entities are not required to change their accounting policies in respect of the classification and measurement of statutory receivables for reporting periods beginning on a date within three years following the date of first adoption of GRAP 108. Entities shall comply with the disclosure requirements of GRAP 108 as and when statutory receivables are classified and measured in accordance with the Standard of GRAP.

The Municipality is taking advantage of the transitional provisions by not classifying or measuring its statutory receivables in accordance with GRAP 108 and therefore, no disclosures required by GRAP 108 has been made.

The Municipality is in the second year of the transitional period and updated the fines receivable as per prior year annual financial statements, however, nothing more in adoption of GRAP 108 was done in the current financial year. The Municipality plans to be fully compliant in the next financial year.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Accrued interest

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions, whichever is applicable.

Other charges

Where the municipality is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, the entity applies the principles as stated in "Accrued interest" above, as well as the relevant policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions.

Impairment losses

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.12 Statutory receivables (continued)

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

The entity assess statutory receivables individually, when assets are individually significant, and individually or collectively for statutory receivables that are not individually significant. Where no objective evidence of impairment exists for an individually assessed debtor (whether individually significant or not), an entity includes the assets in a group of statutory receivables with similar credit risk characteristics and collectively assesses them for impairment.

Statutory receivables that are individually assessed for impairment and for which an impairment loss is or continues to be recognised, are not included in the collective assessment of impairment.

For collective assessments of impairment, statutory receivables with similar credit risk characteristics are grouped together. The credit risk characteristics are indicative of the debtors' ability to pay all amounts due according to the contractual terms.

In making this assessment management may consider the following indicators as guidance for possible impairment:

- Significant financial difficulty experienced by the borrower/debtor;
- Delays in payments (including interest payments) or failure to pay/defaults;
- For economic or legal reasons, allowing disadvantaged customers who are experiencing financial difficulties to pay as and when they can. The entity would not otherwise have considered this concession. For example, allowing disadvantaged customers to pay their account when they can due to the fact that the water it supplies to the customer is a basic human right;
- It is probable that the borrower/debtor will enter sequestration (bankruptcy) or other financial reorganisation;
- Observable data, for example historical data, indicating that there is a decrease in the estimated future cash flows that will be received (which can be measured reliably), from a group of statutory receivables (statutory receivables with similar credit risk characteristics grouped together) since the initial recognition of those receivables. The decrease may not yet be identified for the individual financial receivable in the group. These can include:
 - the payment status of borrowers/debtors in the group has deteriorated (e.g. an increased number of delayed payments);
 - or
 - national or local economic conditions that are in line with non-payments in the group (e.g. an increase in the unemployment rate in the geographical area of the borrowers/debtors, or adverse changes in market conditions that affect the borrowers/debtors in the group)
- Accounts in arrears for a period longer than the initial estimated repayment period;
- Accounts with arrears of over 90 days showing no repayments in the last financial year;
- Accounts handed over for collection;
- Any negative changes in the ability of debtors and borrowers to repay the amounts due to the entity (e.g. an increased number of late payments);
- A breach in contract, such as a default in interest or capital payments.

Management need not utilize all the indicators given above as guidance but only use the indicators to which management has sufficient information to make the assessment for possible or actual impairment.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk-free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.12 Statutory receivables (continued)

- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.13 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting surplus nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable surplus will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting surplus nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses and unused STC credits to the extent that it is probable that future taxable surplus will be available against which the unused tax losses and unused STC credits can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in surplus or deficit for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to net assets; or
- a business combination.

Current tax and deferred taxes are charged or credited to net assets if the tax relates to items that are credited or charged, in the same or a different period, to net assets.

VAT

The entity accounts for VAT on the accrual basis, and is liable for VAT on the payment basis. The entity is liable to account for VAT at the standard rate in terms of section 7(1)(a) of the Value Added Tax Act, (Act 89 of 1991) in respect of the supply of goods or services, except where the supplies are specifically zero-rated in terms of section 11 of the VAT Act, exempted in terms of section 12 of the VAT Act or are scoped out for VAT purposes. The entity accounts for VAT on a monthly basis.

1.14 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.14 Leases (continued)

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

1.15 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.16 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation and amortisation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

All assets of the entity are accounted for as non-cash generating assets.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Basis for estimates of future cash flows

In measuring value in use the municipality:

- base cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the asset. Greater weight is given to external evidence;
- base cash flow projections on the most recent approved financial budgets/forecasts, but excludes any estimated future cash inflows or outflows expected to arise from future restructuring's or from improving or enhancing the asset's performance. Projections based on these budgets/forecasts covers a maximum period of five years, unless a longer period can be justified; and
- estimate cash flow projections beyond the period covered by the most recent budgets/forecasts by extrapolating the projections based on the budgets/forecasts using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. This growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used, unless a higher rate can be justified.

Composition of estimates of future cash flows

Estimates of future cash flows include:

- projections of cash inflows from the continuing use of the asset;
- projections of cash outflows that are necessarily incurred to generate the cash inflows from continuing use of the asset (including cash outflows to prepare the asset for use) and can be directly attributed, or allocated on a reasonable and consistent basis, to the asset; and
- net cash flows, if any, to be received (or paid) for the disposal of the asset at the end of its useful life.

Estimates of future cash flows exclude:

- cash inflows or outflows from financing activities; and
- income tax receipts or payments.

The estimate of net cash flows to be received (or paid) for the disposal of an asset at the end of its useful life is the amount that the municipality expects to obtain from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the estimated costs of disposal.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.16 Impairment of cash-generating assets (continued)

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

The entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the entity estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.16 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.17 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation and amortisation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.17 Impairment of non-cash-generating assets (continued)

All assets of the entity are accounted for as non-cash generating assets.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

When estimating the value in use of an asset, the entity estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the entity applies the appropriate discount rate to those future cash flows.

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an oversized or overcapacity asset. Oversized assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Restoration cost approach

Restoration cost is the cost of restoring the service potential of an asset to its pre-impaired level. The present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment. The latter cost is determined as the depreciated reproduction or replacement cost of the asset, whichever is lower.

Service units approach

The present value of the remaining service potential of the asset is determined by reducing the current cost of the remaining service potential of the asset before impairment, to conform to the reduced number of service units expected from the asset in its impaired state. The current cost of replacing the remaining service potential of the asset before impairment is determined as the depreciated reproduction or replacement cost of the asset before impairment, whichever is lower.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.17 Impairment of non-cash-generating assets (continued)

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.18 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.18 Employee benefits (continued)

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.18 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the consolidated annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
 - interest cost;
 - the expected return on any plan assets and on any reimbursement rights;
 - actuarial gains and losses;
 - past service cost;
 - the effect of any curtailments or settlements; and
 - the effect of applying the limit on a defined benefit asset (negative defined benefit liability).
-

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.18 Employee benefits (continued)

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is [OR is not] presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.18 Employee benefits (continued)

Other long term employee benefits

The entity provides other long term employee benefits to qualifying employees in the form of long service award.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The entity shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost, which shall all be recognised immediately; and
- the effect of any curtailments or settlements.

The entity determines the present value of long term employee benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity uses the Projected Unit Credit Method to determine the present value of its long service employee benefit and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

1.19 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.19 Provisions and contingencies (continued)

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of an activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 54.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, a municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.19 Provisions and contingencies (continued)

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy 1.16 and 1.17.

If the related asset is measured using the revaluation model:

- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
 - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;
- in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the asset been carried under the cost model, the excess is recognised immediately in surplus or deficit;
- a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the reporting date. Any such revaluation is taken into account in determining the amounts to be taken to surplus or deficit and net assets. If a revaluation is necessary, all assets of that class is revalued; and
- the Standard of GRAP on Presentation of Financial Statements requires disclosure on the face of the statement of changes in net assets of each item of revenue or expense that is recognised directly in net assets. In complying with this requirement, the change in the revaluation surplus arising from a change in the liability is separately identified and disclosed as such.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.20 Commitments

Where the entity has a contractual commitment in respect of the acquisition of property, plant and equipment, these are disclosed in note .53

The commitments as disclosed are the contractual amount less any payments made in respect of the contract.

1.21 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Revenue from exchange transactions consists primarily of services charges, rentals, interest received and other services rendered.

When considering the probability of the future economic benefits that will flow to the entity, consideration is given to the requirements as outlined in IGRAP 1.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.21 Revenue from exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

Rendering of services consist out of solid waste, sanitation, sewerage and water services.

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Rental income

Leases revenue from operating leases shall be recognised as revenue on a straight-line basis over the lease term in accordance with the accounting policy on Leases.

Revenue arising from the use by others of entity assets yielding rental income is recognised when:

- a) it is probable that the economic benefits or service potential associated with the transaction will flow to the entity; and
- b) the amount of the revenue can be measured reliably.

1.22 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Revenue from non-exchange transactions consists primarily of grants from National - and Provincial Government, Property rates and Fines revenue.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.22 Revenue from non-exchange transactions (continued)

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

When considering the probability of the future economic benefits that will flow to the entity, consideration is given to the requirements as outlined in IGRAP 1.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Taxes

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.22 Revenue from non-exchange transactions (continued)

Transfers

Apart from Services in kind, which are not recognised unless it is significant to the entity's operations, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Debt forgiveness and assumption of liabilities

The municipality recognise revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Bequests

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality, and the fair value of the assets can be measured reliably.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

The municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

Concessionary loans received

A concessionary loan is a loan granted to, or received by an entity on terms that are not market related.

The portion of the loan that is repayable, along with any interest payments, is an exchange transaction and is accounted for in accordance with the Standard of GRAP on Financial Instruments. The off-market portion of the loan is a non-exchange transaction. The off-market portion of the loan that is recognised as non-exchange revenue is calculated as the difference between the proceeds received from the loan, and the present value of the contractual cash flows of the loan, discounted using a market related rate of interest.

The recognition of revenue is determined by the nature of any conditions that exist in the loan agreement that may give rise to a liability. Where a liability exists the cash flow statement recognises revenue as and when it satisfies the conditions of the loan agreement.

Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the entity has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.23 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.24 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.25 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.26 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.27 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Detailed disclosures are made in note 62 to the annual financial statements as required by the Municipal Finance Management Act, (Act No. 56 of 2003).

1.28 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Detailed disclosures are made in note 63 to the annual financial statements as required by the Municipal Finance Management Act, (Act No. 56 of 2003).

1.29 Irregular expenditure

Irregular expenditure as defined by the Municipal Finance Management Act, (Act No. 56 of 2003) is expenditure incurred by a municipality or municipal entity that is not in accordance with or in contravention of:

- a) the MFMA, and which has not been condoned in terms of sections 170
- b) the Municipal Systems Act (Act No.32 of 2000),
- c) the Public Office Bearers Act (Act No. 20 of 1998)
- d) the requirements of the entity's supply chain management policy of the municipality or municipal entity or in or in accordance with the municipality's by-laws giving effect to such policy and which has not been condoned in terms of such policy or by-law.

Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Detailed disclosures are made in note 64 to the annual financial statements as required by the Municipal Finance Management Act, (Act No. 56 of 2003).

1.30 Internal reserves

Self insurance reserve

The municipality has a Self Insurance Reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the Self-Insurance Reserve is determined based on the insurance risk carried by the municipality, which is calculated by the entity's external insurance broker and is reinstated or increased by a transfer from the accumulated surplus or deficit.

Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

Compensation for occupational injuries and diseases (COID) reserve

The Compensation for Occupational Injuries and Diseases Act (Act 130 of 1993) is to provide for payment of medical treatment and compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, or for death resulting from such injuries or diseases. The contribution to the COID fund is determined by the Compensation Commissioner. The municipality is an exempt employer in terms of Section 84 (1) (a)(ii) & (2) and as such does not pay any assessments to the COID Commissioner. In terms of the exempt status the municipality is mandated to establish its own fund and administers this fund in terms of the COID Act.

Amounts are transferred to the COID reserve from the accumulated surplus or deficit based on the amounts as approved in the annual budget and determined by the Compensation Commissioner as well as additional amounts deemed necessary to ensure that the balance of the reserve is adequate to offset potential claims.

Claims are paid as determined by the Compensation Commissioner. Claims are settled by transferring a corresponding amount from the COID reserve to the accumulated surplus or deficit.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.31 Revaluation reserve

The surplus arising from the revaluation of land, buildings, water meters and zoo animals is credited to a non-distributable reserve. The revaluation surplus is realised as revalued assets are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

Any impairment loss of a revalued asset shall be treated as a revaluation decrease. To the extent that the impairment loss exceeds the revaluation surplus for the same asset, the impairment loss is recognised in the accumulated surplus/(deficit).

1.32 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Segmental information on property, plant and equipment, as well as income and expenditure is set out in Note 70, based on the International Government Financial Statistics classifications and the budget formats prescribed by National Treasury. The entity operates solely in its area of jurisdiction as determined by the Demarcation Board.

Segment information is prepared in conformity with the accounting policies applied for preparing and presenting the annual financial statements.

1.33 Budget information

Municipality is subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by nature classification. The approved budget and the annual financial statements are not prepared on the same classification basis.

The annual budget figures included in the annual financial statements are for the entity and do not include budget information relating to subsidiaries. The separate budget for the entity has been recompiled for the presentation in the annual financial statements. The recompilation does not constitute changes or revisions of the consolidated budget as approved by the Council.

The Statement of comparative and actual information has been included in the consolidated annual financial statements as the recommended disclosure when the consolidated annual financial statements and the budget are not on the same basis of accounting as determined by National Treasury. Explanatory comments to material differences are provided in note 69 to the annual financial statements.

1.34 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.34 Related parties (continued)

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its consolidated annual financial statements.

1.35 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.36 Service concession arrangements: Entity as grantor

Identification

Service concession arrangement is a contractual arrangement between a grantor and an operator in which an operator uses the services concession asset to provide a mandated function on behalf of a grantor for a specified period, where the operator is compensated for its services over the period of service concession arrangement.

A grantor is the entity that grants the right to use the service concession asset to the operator.

A mandated function involves the delivery of a public service by an operator on behalf of a grantor that falls within the grantor's mandate.

An operator is the entity that uses the service concession asset to provide a mandated function subject to the grantor's control of the asset.

A service concession asset is an asset used to provide a mandated function in a service concession arrangement that:

- is provided by the operator which:
 - the operator constructs, develops, or acquires from a third party; or
 - is an existing asset of the operator; or
- is provided by the grantor which:
 - is an existing asset of the grantor; or
 - is an upgrade to an existing asset of the grantor.

Recognition of asset and liability

The entity recognises an asset provided by the operator and an upgrade to an existing asset of the entity, as a service concession asset if the entity controls or regulates what services the operator must provide with the asset, to whom it must provide them, and at what price, and if the entity controls (through ownership, beneficial entitlement or otherwise) any significant residual interest in the asset at the end of the term of the arrangement. This applies to an asset used in a service concession arrangement for its entire economic life (a "whole-of-life" asset).

After initial recognition or reclassification, service concession assets are clearly identified from other assets within the same asset category, and are clearly identified from owned and/or leased assets.

Where the entity recognises a service concession asset, and the asset is not an existing asset of the entity (grantor), the entity (grantor) also recognises a liability.

The entity does not recognise a liability when an existing asset of the entity is reclassified as a service concession asset, except in circumstances where additional consideration is provided by the operator.

Measurement of asset and liability

The entity initially measures the service concession asset as follows:

- Where the asset is not an existing asset of the entity, the asset is measured at its fair value.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.36 Service concession arrangements: Entity as grantor (continued)

- Where the asset is an existing asset of the entity and it meets the recognition criteria of a service concession asset, the asset is reclassified as a service concession asset, and the asset is accounted for in accordance with the policy on Investment property, Property, plant and equipment, Intangible assets, or Heritage assets, as appropriate.

The entity initially measures the liability at the same amount as the service concession asset, adjusted by the amount of any other consideration from the entity to the operator, or from the operator to the entity.

Financial liability model

Where the entity has an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition, or upgrade of a service concession asset, the entity accounts for the liability as a financial liability.

The entity allocates the payments to the operator and accounts for them according to their substance as a reduction in the liability recognised, a finance charge, and charges for services provided by the operator.

The finance charge and charges for services provided by the operator in a service concession arrangement are accounted for as expenses.

Where the asset and service components of a service concession arrangement are separately identifiable, the service components of payments from the entity to the operator are allocated by reference to the relative fair values of the service concession asset and the services.

Where the asset and service components are not separately identifiable, the service component of payments from the entity to the operator is determined using estimation techniques.

Grant of a right to the operator model

Where the entity does not have an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition, or upgrade of a service concession asset, and grants the operator the right to earn revenue from third-party users or another revenue-generating asset, the entity accounts for the liability as the unearned portion of the revenue arising from the exchange of assets between the entity and the operator.

The entity recognises revenue and reduces the liability according to the substance of the service concession arrangement.

Dividing the arrangement

If the entity pays for the construction, development, acquisition, or upgrade of a service concession asset partly by incurring a financial liability and partly by the grant of a right to the operator, it accounts separately for each part of the total liability.

Other liabilities, contingent liabilities and contingent assets

The entity accounts for other liabilities, contingent liabilities, and contingent assets arising from a service concession arrangement in accordance with the policy on Provisions, Contingent liabilities and contingent assets and Financial instruments.

Other revenues

The entity accounts for revenues from a service concession arrangement, other than those relating to the grant of a right to the operator model, in accordance with the Standard of GRAP on Revenue from exchange transactions.

Recognition of the performance obligation and the right to receive a significant interest in a service concession asset

If the entity controls a significant residual interest in a service concession asset at the end of the service concession arrangement through ownership, beneficial entitlement or otherwise, and the arrangement does not constitute a finance or an operating lease, the entity recognises its right to receive the residual interest (i.e. a receivable) in the service concession asset at the commencement of the arrangement.

The right to receive a residual interest in the service concession asset to be received at the end of the arrangement, is an exchange consideration. This is because the entity will receive an asset in exchange for granting the operator access to the asset while providing a mandated function on its behalf in accordance with the substance of the arrangement.

In terms of the policy on Revenue from exchange transactions, the exchange consideration is recognised and measured at fair value. The value of the receivable (the right to the residual interest in the asset), receivable at the end of the service concession arrangement, reflects the value of the service concession asset as if it were already in the age and in the condition expected at the end of the service concession arrangement.

When the entity recognises the right to receive a residual interest in the service concession asset, it also recognises its performance obligation for granting the operator access to the service concession asset in accordance with the substance of the arrangement. The value of the performance obligation is the same as the receivable interest recognised at the commencement of the service concession arrangement.

The performance obligation is reduced and revenue is recognised based on the substance of the arrangement.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Accounting Policies

1.36 Service concession arrangements: Entity as grantor (continued)

Where service concession arrangements include provisions to adjust the arrangement for changes, the effect of such changes is deemed to have taken place at the inception of the service concession arrangements.

1.37 Advance receipts

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

In a non-exchange transaction, an entity either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

All receipts received in advance are classified as non-exchange transactions as no approximate equal value is exchanged between the parties. Refer to note 16 Payables from non-exchange transactions where these receipts in advance are disclosed.

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• IGRAP 20: Accounting for Adjustments to Revenue	01 April 2020	Unlikely there will be a material impact
• GRAP 1 (amended): Presentation of Financial Statements	01 April 2020	Unlikely there will be a material impact
• GRAP 34: Separate Financial Statements	01 April 2020	Unlikely there will be a material impact
• GRAP 35: Consolidated Financial Statements	01 April 2020	Unlikely there will be a material impact
• GRAP 36: Investments in Associates and Joint Ventures	01 April 2020	Unlikely there will be a material impact
• GRAP 37: Joint Arrangements	01 April 2020	Unlikely there will be a material impact
• GRAP 38: Disclosure of Interests in Other Entities	01 April 2020	Unlikely there will be a material impact
• GRAP 110 (as amended 2016): Living and Non-living Resources	01 April 2020	Unlikely there will be a material impact
• IGRAP 1 (revised): Applying the Probability Test on Initial Recognition of Revenue	01 April 2020	Unlikely there will be a material impact
• GRAP 108: Statutory Receivables	01 April 2019	In accordance with the Transitional provisions for the standard provided in Directive 3, entities are not required to change their accounting treatment for reporting periods beginning on a date within three years following the first adoption of GRAP 108.

2.2 Standards and interpretations issued, but not yet effective

The entity has not applied the following standards and interpretations, which have been published and are mandatory for the entity's accounting periods beginning on or after 01 July 2021 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 104 (amended): Financial Instruments	To be determined	Unlikely there will be a material impact
• Guideline: Guideline on Accounting for Landfill Sites	To be determined	Unlikely there will be a material impact
• Guideline: Guideline on the Application of Materiality to Financial Statements	To be determined	Unlikely there will be a material impact

Consumer receivables from non-exchange transactions pledged as security

None of the statutory receivables from non-exchange transactions were pledged as security for any financial liability.

Credit quality of consumer receivables from non-exchange transactions

consumer receivables from non-exchange transactions which are less than 3 months past due are not considered to be impaired.

Consumer receivables from non-exchange transactions

None of the consumer receivables from non-exchange transactions were pledged as security for any financial liability.

Consumer receivables from non-exchange transactions past due but not impaired

In relation to government debt, even though collections of municipal debts from government are slower than expected, the assessment was made by the municipality in line with the GRAP 104 and also other factors e.g. legislation available to ensure that government entities settle their debt, intervention from National Treasury etc. Government debt is considered to be fully recoverable. Taking this into account the municipality has not provided for any impairment on government debt.

Consumer receivables from non-exchange transactions which are less than 3 months past due are not considered to be impaired. At 30 June 2021, R 131 438 696 (2020: R 111 901 540) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	71 173 955	59 927 431
2 months past due	60 264 741	51 974 109

Mangaung Metropolitan Municipality

Consumer debtors pledged as security

None of the consumer receivables from exchange transactions were pledged as security for any financial liability.

Credit quality of consumer debtors

The credit quality of consumer receivables from exchange transactions that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates.

consumer receivables from exchange transactions are only due after 30 days. Interest shall be paid on accounts which have not been paid within 30 days from the date on which the account became due, at a rate of 1% higher than the prime rate for the period.

None of the consumer receivables from exchange transactions that are fully performing have been renegotiated in the last year.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand 2021 2020

5. Consumer receivables from exchange transactions (continued)

Consumer debtors past due but not impaired

In relation to government debt, even though collections of municipal debts from government are slower than expected, the assessment was made by the municipality in line with the GRAP 104 and also other factors e.g. legislation available to ensure that government entities settle their debt, intervention from National Treasury etc. Taking this into account, the Controlling entity has not provided for any impairment on government debt as the debt is considered to be fully recoverable.

The controlled entity, Centlec (SOC) Ltd, as a State-owned entity has however assessed government debt and impaired government debt of R337 005 884 (2020: R288 281 627) due to their norms and standards.

Consumer debtors which are less than 3 months past due are not considered to be impaired. At 30 June 2021, R 825 476 887 (2020: R 689 886 573) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	270 428 718	392 742 609
2 months past due	150 717 250	87 925 942
3 months past due	404 330 919	209 218 022

Consumer debtors impaired

As of 30 June 2021, consumer debtors of R 3 979 439 630 (2020: R 3 271 947 735) were impaired and provided for.

The amount of the provision was R 3 979 439 630 as of 30 June 2021 (2020: R 3 271 947 735).

The ageing of these loans is as follows:

Current	8 426 618	9 565 138
1 month past due	6 564 167	7 569 458
2 month past due	7 283 077	10 819 686
3 month past due	589 600 859	565 810 940
Over 3 months	3 367 564 909	2 678 182 513

Reconciliation of allowance for impairment of consumer debtors

Opening balance	3 271 947 735	2 754 024 208
Allowance for impairment	707 491 895	517 923 527
	3 979 439 630	3 271 947 735

Due to the limitations on the financial system it is impractical to disclose the impaired interest on consumer receivables from exchange transactions.

6. Other receivables from non-exchange transactions

Fines receivables	280 936 095	274 646 292
Fines receivables - Impairment	(279 985 828)	(274 246 022)

7. Other receivables from exchange transactions (continued)

Other receivables from exchange transactions past due but not impaired

Other receivables from exchange transactions which are less than 3 months past due are not considered to be impaired. At 30 June 2021, R 6 544 047 (2020: R 3 533 476) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	6 544 047	3 533 476
------------------	-----------	-----------

Other receivables from exchange transactions impaired

As of 30 June 2021, other receivables from exchange transactions of R 92 250 216 (2020: R 76 190 698) were impaired and provided for.

The amount of the provision was R 92 250 216 as of 30 June 2021 (2020: R 76 190 698).

The ageing of these loans is as follows:

Over 3 months	92 250 216	76 190 698
---------------	------------	------------

Reconciliation of provision for impairment of trade and other receivables

Opening balance	76 190 698	62 412 461
Provision for impairment	16 059 518	13 778 237
	92 250 216	76 190 698

Sundry debtors consist of debtors raised from other income from exchange transactions recognised (refer to note 33).

Due to the limitations on the financial system it is impractical to disclose the impaired interest on other receivables from exchange transactions.

8. Cash and cash equivalents

Cash and cash equivalents consist of:

Cash on hand	142 049	137 049
Bank balances	44 613 868	75 226 415
Short-term deposits	166 744 014	352 375 208
	211 499 931	427 738 672

An unlimited surety is provided by Free State Provincial Government, National Treasury and the Development Bank of South Africa.

The total of the overdraft facility available to the entity is R50,000,000 (2019: R50,000,000).

There are no restrictions on the entity's ability to realise cash balances.

Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or historical information about counterparty default rates:

Credit rating		
Ba1	-	427 487 542
Ba2	211 357 882	-
	211 357 882	427 487 542

Cash and cash equivalents pledged as collateral

Total financial assets pledged as collateral for the COID Reserve	29	25 136 426	24 481 528
-------------------------------------------------------------------	----	------------	------------

The term deposit investment is pledged as security to the Compensation Commissioner of the Workmen's Compensation Fund to guarantee the payment of claims in respect of injuries while on duty.

	Opening balance	Fair value adjustments	Total
Investment property	1 570 113 653	1 124 788	1 571 238 441

Investment property above includes the following:

Revenue Generating	1 180 454 100	1 180 454 100
Non-Revenue Generating	390 462 888	390 784 341
	1 570 916 988	1 571 238 441

Property rental income earned during the year was R5,576,262 (2020: R5,007,869) – Refer to note 32. The operating cost of investment properties amounted to R8,309,405 (2020: R7,750,476).

The repairs and maintenance cost for investment properties (all revenue generating) was R205 (2020: R0) in the current financial year.

This cost consists of payments made to contractors for repairing and maintaining assets.

No staff member is engaged in any labour towards the repair and maintenance of investment property.

Pledged as security

No investment property has been pledged as security for any financial liability.

Investment property in the process of being constructed or developed

No investment property is in the process of being constructed or developed.

Details of property

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Details of valuation

The effective date of the valuation was 30 June 2021. The entity's investment property was revalued by independent professional qualified valuers who hold a recognised relevant professional qualification and have recent experience in the locations and categories of the investment properties valued.

The investment properties were revalued with reference to comparable market data where available, as well as information from the deeds office.

Revaluations

Revaluation of land and buildings:

The effective date of the revaluations was 30 June 2017. Revaluations were performed by independent professionally qualified valuers who hold a recognised professional qualification and have recent experience in the locations and categories of the properties valued. The values of the properties were determined based on the market values and the information obtained from the deeds office.

Revaluation of zoo animals:

The effective date of the revaluation was 30 June 2021. The revaluation is performed by independent professionally qualified valuers who hold a recognised professional qualification and have recent experience in valuations of zoo animals.

Revaluations of water meters:

The effective date of the revaluation was 30 June 2018. Revaluations were performed by independent professionally qualified valuers who hold a recognised professional qualification and have recent experience in the locations and categories of the meters valued.

The valuations were performed after the following factors were taken into account:

- the useful lives and;
- the condition of the asset.

Details of properties

A register containing the information required by section 63 of the Municipal Finance Management Act, (Act 56 of 2003) is available for inspection at the registered office of the entity.

The entity's asset management policy requires the verification of all moveable assets on an annual basis. However, due to the Covid-19 pandemic, the verification exercise could not be completed for all moveable assets.

Revaluations

Other heritage assets

The effective date of the revaluation was 30 June 2017. Revaluations were performed by independent professionally qualified valuers who hold a recognised professional qualification and have recent experience in the locations and categories of the properties valued.

The values of the properties were determined based on the market values and the information obtained from the deeds office.

The valuation was performed after the following factors were taken into account:

- the useful life of the asset;
- the condition of the asset; and
- the location of the asset.

Heritage assets in the process of being constructed or developed

No heritage assets are in the process of being constructed or developed.

Deemed costs

Deemed cost was determined using depreciated replacement cost.

Recognition of deferred tax asset

An entity shall disclose the amount of a deferred tax asset and the nature of the evidence supporting its recognition, when:

- the utilisation of the deferred tax asset is dependent on future taxable surpluses in excess of the surpluses arising from the reversal of existing taxable temporary differences; and
- the municipality has suffered a deficit in either the current or preceding period in the tax jurisdiction to which the deferred tax asset relates.

The deferred tax asset arose as a result of the municipal entity not having been subject to income tax in the past. However in the 2014/15 financial year the municipal entity had to account for income tax which resulted in the wear and tear allowances being in excess of the available surplus. The municipal entity has the ability to generate profit in the foreseeable future against which temporary differences will be utilised.

Deferred tax assumptions

2020

14. Deferred tax (continued)

As at 30 June 2016 no guidance was received from SARS on the transition from a tax exempt entity to a taxable entity. Due to this, uncertainties in the calculation of the municipal entity's taxation exist and will continue to exist going forward until a pronouncement is made by SARS on the municipal entity's tax calculation. In the absence of a pronouncement from SARS and the fact that the municipal entity is no longer tax exempt, the municipal entity had to make certain key assumptions relating to income- and deferred tax to be able to account for tax. These assumptions are set out as follows:

Infrastructure assets

The base cost for the electrical infrastructure assets of the municipal entity was determined by using the audited infrastructure fixed asset register. The tax exemption for the municipal entity was no longer applicable as at the 1 July 2014, on this date the municipal entity embarked on an exercise to determine the base cost for each of the Infrastructure assets. The closing balance for the 2013/2014 financial year was deemed as the most accurate value to be used as the base cost and carrying values for tax purposes moving forward. Up until 1 July 2014 management had never claimed any wear & tear on infrastructure assets. The base cost was therefore the deemed cost as at 1 July 2014.

Infrastructure assets of the municipal entity are all carried on the revaluation model as per General Recognised Accounting Standards 17 - Property plant and equipment. There is no General Recognised Accounting Standards standard applicable to taxation, therefore the municipal entity referred to the international accounting standards (IAS) for further guidance, which is IAS 12: Income taxation. Through inspection of the income tax act and the practice notes it was noted that there was no clear guidance regarding the write off periods for electrical infrastructure assets. Due to this Section 12D of the income tax action was deemed as the best alternative to use to determine the write off periods for most of the electrical infrastructure assets. Section 12D was applied to the following electrical infrastructure assets:

High Voltage conductors, Medium Voltage conductors, Low Voltage conductors and the Streetlights. All other categories of infrastructure assets could operate independent of transmission lines and Section 12D would not be applicable to these assets.

As per the Income Tax Act, 1962 (Act 58 of 1962) the kind of information that could be useful in determining the expected useful life of an asset/write off period include:

- Independent engineering information;
- The taxpayer's own past experience with similar assets;

Based on the above and due to insufficient guidance in the Income Tax Act, 1962 (Act 58 of 1962) the option of best professional judgment in determining an accurate write off period for the Infrastructure assets was used as follows:

- For all the distribution lines and cables a 5% write off period was used
- For all other infrastructure assets a 5 year write off period was adopted as the assets have been in operation for some time and as per the engineering information they cannot fall within Section 12D of the Income Tax Act, 1962 (Act 58 of 1962) .

Section 12 of the Income Tax Act, 1962 (Act 58 of 1962) was applied therefore no apportionment of the wear and tear was done. The wear and tear of assets is the amount that the South African Receiver of Revenue considers an appropriate write off timeframe for each asset.

The wear and tear was calculated as follows:

- The depreciated replacement cost was taken per asset and any addition for the year was added and this value was multiplied by 20%
- When an asset is disposed of during the financial year wear and tear is still calculated for that asset and an inspection for a possible recoupment is done.

Non-Infrastructure assets

All assets other than infrastructure assets were written off by making use of Practice note 19.

Debt impairment

The provision for debt impairment is limited as a tax deduction to the extent that the originating revenue was taxable. Since the municipal entity was tax exempt for a period the revenue recognised and subsequently impaired during this period could not fully be included as a tax deduction. Due to this only the movement in the debt impairment for the year when the municipal entity first became taxable was used in calculating the tax.

Other payables - Grants	979 450	979 450
Other payables - Salary related	85 984 948	72 925 571
Retentions	115 397 328	101 366 213
Unallocated electricity consumer and vendor payments received in advance	59 379 245	56 563 726
Trade payables	1 496 584 815	1 481 077 020
	2 170 104 786	2 073 910 816

The entity defaulted on the payment of suppliers within 30 days. The average term of payment of suppliers for the year was 164 days (2020: 163 days).

16. Payables from non-exchange transactions

Payments received in advance	333 477 571	260 393 695
Other	2 207 711	2 499 765
Deposits	938 850	911 748
	336 624 132	263 805 208

17. VAT payable

VAT payable	105 029 981	27 588 485
-------------	-------------	------------

VAT is payable on the payment basis. VAT is paid over to SARS only once payment is received from debtors.

18. Consumer deposits

Electricity	127 042 880	128 776 174
Water	33 351 036	33 599 273
	160 393 916	162 375 447

Guarantees in lieu of water consumer deposits amounted to R 2 594 386 (2020: R 2 614 769).

Guarantees in lieu of vendor deposits amounted to R 2 153 891 (2020: R 2 153 891).

Guarantees in lieu of consumer deposits amounted to R 37 329 195 (2020: R 39 164 721).

Fair value hierarchy

For financial liabilities recognised at fair value, disclosure is required of a fair value hierarchy which reflects the significance of the inputs used to make the measurements. The fair value hierarchy have the following levels:

Level 1 represents those liabilities which are measured using unadjusted quoted prices in active markets for identical liabilities.

Level 2 applies inputs other than quoted prices that are observable for the liabilities either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 applies inputs which are not based on observable market data.

Fair values of financial liabilities measured or disclosed at fair value

Level 1

Current liabilities	13 644 441	74 194 252
	53 082 006	148 755 920

The entity leases various equipment and vehicles under finance leases. The average lease term is between 2 and 5 years and the average borrowing rate is between 9% and 15%. Leases are not renewed automatically upon expiry, unless otherwise instructed by the entity.

No arrangements have been entered into for contingent rent.

The entity did not default on any of the finance lease obligations, whether it be on the capital or interest portion.

None of the terms attached to the existing finance lease obligations were renegotiated.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets. Refer note 10.

It is the municipal entity's policy to lease certain photo copiers under finance leases. The average lease term is 3 years and the average effective borrowing rate was 9,25%. Initial lease payment varied between R6 442 and R8 647 per month and are subject to prime lending rates.

Lease liabilities are effectively secured as the rights to the leased asset revert to the lessor in the event of default.

The fair value of finance lease liabilities approximates their carrying amounts.

23. Employee benefit obligations

Defined benefit plan

The defined benefit liability as disclosed below is represented by three different post-employment benefits. None of the benefits set out below are externally funded.

Post retirement medical aid plan

Active members receive a fixed subsidy of 60% of medical aid contributions during the current working year, up to a specified maximum employer contribution. The spouse or adult dependant of an active member is entitled to a 60% subsidy of their contributions. This proportion of the subsidy will continue to be paid in the event of the principal member's death.

Continuation members receive a fixed subsidy of 60% of medical aid contributions during the current working year, up to a specified maximum employer contribution. The spouse or adult dependant of a continuation member is entitled to a 60% subsidy of their contributions.

Pension benefits

Pension gratuities are payable to retired employees and pensioners who were in service of the council on or before 1 October 1981, who did not qualify to be members of the Free State Joint Municipal Pension Fund or Free State Local Government Pension Fund, or who were not members of a pension fund by this date, with 20 years of uninterrupted service and a minimum retirement age of 60 years have been obtained.

Long service awards

Long service awards are payable to qualifying in-service employees. The leave benefits are in accordance with paragraph 11 of the South African Local Government Bargaining Council (SALGBC) collective agreement on conditions of service for the Free State division of SALGBC.

The amounts recognised in the statement of financial position are as follows:

Carrying value

Present value of the defined benefit obligation-wholly unfunded	523 524 629	559 097 163
Present value of the defined benefit obligation-partly or wholly funded	50 324 990	50 327 443
Fair value of plan assets	25 019 000	28 705 532
Fair value of reimbursement rights	(29 543 615)	(29 650 983)
Actuarial (gains)/losses	39 319 997	(84 954 526)
	608 645 001	523 524 629

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand	2021			2020
23. Employee benefit obligations (continued)				
2020	Pension fund	Medical aid	Long service award	Total
Defined benefit obligation as at 30 June 2019	2 281 755	438 463 682	118 351 726	559 097 163
Interest costs	155 741	41 031 448	9 140 254	50 327 443
Current service costs	-	17 039 615	11 665 917	28 705 532
Benefits paid	(290 016)	(13 411 651)	(15 949 316)	(29 650 983)
Actuarial gains/losses	(155 851)	(90 829 094)	6 030 419	(84 954 526)
	1 991 629	392 294 000	129 239 000	523 524 629

Key assumptions used

Assumptions used at the reporting date:

Discount rates -Pension Fund	7,87 %	5,47 %
Discount rate-Medical Aid	10,22 %	10,54 %
Discount rate - Long service award	8,60 %	6,98 %
Expected increase in healthcare costs	6,89 %	6,57 %
Inflation rate-Medical aid	4,79 %	4,55 %
Salary inflation rate - Long service award	5,60 %	3,75 %
Expected retirement age (years)	62	62

A health care cost inflation rate of 6.57% has been assumed. This is 1.50% in excess of expected CPI inflation over the expected term of the liability, namely 5.07%.

A larger differential would be unsustainable, eventually forcing members to less expensive options. This implies a net discount rate of 3.73% which derives from $((1+10.54\%)/(1+6.57\%))-1$.

The expected inflation assumption of 5.07% was obtained from the differential between market yields on index-linked bonds consistent with the estimated term of the liabilities (4.72%) and those of fixed interest bonds (10.54%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). This was therefore determined as follows: $((1+10.54\%-0.50\%)/(1+4.72\%))-1$.

Withdrawal rate assumptions:

In the absence of credible past withdrawal data for these particular schemes, the withdrawal assumptions have been set in line with those generally observed in the South African market.

The withdrawal rates vary from 3% to 9% for the age group 20 - 50 years, while the estimated withdrawal rate from 55 years is calculated at 0%.

Other assumptions

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed healthcare cost trends rates would have the following effects:

	One percentage point increase	One percentage point decrease
Effect on defined benefit obligation	426 429 000	353 916 000
Effect on the aggregate of the service cost	15 203 000	11 593 000
Effect on the aggregate of the interest cost	44 214 000	36 576 000

Amounts for the current and previous four years are as follows:

	2021 R	2020 R	2019 R	2018 R	2017 R
Defined benefit obligation	608 645 001	523 524 629	559 097 163	740 373 000	841 139 000

24. FRESHCO Liability		
FRESHCO Liability	163 648 133	177 776 030
<p>The entity has entered into an agreement with the Free State Social Housing Company (FRESHCO), a section 21 company, to implement and pursue a programme of Social Housing suitable for low to medium income households. The agreement commenced on 1 February 2010 and shall be terminated on 31 January 2033 unless both parties agree to extend the agreement period. The entity charges FRESHCO a nominal rental amount on a monthly basis which escalates by 5% annually. The rental amount is included in note 32 – Rental of facilities and equipment.</p> <p>In terms of the agreement, FRESHCO will refurbish and maintain 351 existing municipal flats and build 592 additional flats in the suburb called Brandwag. This will remain the property of the entity. The entity will provide municipal infrastructure where these are not currently in existence. FRESHCO will utilise a portion of the rental income earned from renting out these properties to maintain and refurbish these flats.</p> <p>The amount is recognised as revenue over the period of the agreement upon completion of the assets.</p>		
25. Land availability liability		
Hillside view	282 670 558	293 973 089
<p>The entity has entered into agreements with developers to implement and pursue a programme of land development which will provide infrastructure and housing suitable for low to medium income households.</p> <p><i>Hillside view:</i> The agreement commenced on 10 July 2014 and shall be terminated on 31 October 2032, unless both parties agree to extend the agreement period.</p> <p>In terms of the agreement, the developer will develop 762 erven in Mangaung Extension 34, and 1580 erven in Mangaung Extension 35. This development will be known as the Hillside Development.</p> <p>The land shall remain the property of the entity throughout the development. Upon completion of development, the entity shall retain 30% of the single residential erven within the development, as well as the infrastructure services.</p> <p>The developer shall be entitled to sell the remaining developed and serviced erven to third parties, and will retain the proceeds of these sales as compensation for the developed assets retained by the entity.</p> <p>The developer shall contribute to the bulk infrastructure installations within the development and shall provide a contribution for the land, upon sale to the third parties.</p> <p>The revenue from these sales will be recognised upon transfer to the third party, and the related liability shall be derecognised.</p> <p>The buildings retained by the entity shall be capitalised throughout the development process.</p>		
26. Revaluation reserve		
Opening balance	5 018 707 913	2 402 238 397
Revaluation of assets	(2 990 833)	2 637 228 752

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand 2021 2020

37. Property rates

Rates received

Residential and business / commercial	779 807 646	1 057 911 094
Government	410 583 346	276 943 193
	1 190 390 992	1 334 854 287

Valuations

Residential	68 972 371 472	68 452 458 163
Commercial	22 151 331 153	22 060 662 133
Government	11 503 758 376	13 391 217 899
Municipal	4 293 655 212	4 284 822 158
	106 921 116 213	108 189 160 353

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2017. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

The first R 80,000 of the rateable value of residential property is exempted from taxes, including properties which are zoned for the purpose of town houses and flats, as well as smallholdings and farms used solely for residential and agricultural purposes.

In respect of qualifying senior citizens and disabled persons, the first R 250,000 of the rateable value of their residential properties is exempted from rates subject to the property value not exceeding R 2,000,000.

2021:

From 1 July 2020 the basic rates were adjusted as follows:

- R0.008432, multiply by comma two five cent (0.25), per rand on the rateable value of farm property (exempt from VAT);
- R0.008432, on the value of rateable residential property
- R0.034634 on the value of rateable government property
- R0.034634 on the value of rateable business property
- R0.002109 on the value of rateable Public Service Infrastructure

2020:

From 1 July 2019 the basic rates were adjusted as follows:

- R0.002010 on the value of rateable farm property
- R0.008038 on the value of rateable residential property
- R0.033016 on the value of rateable government property
- R0.033016 on the value of rateable business/commercial property
- R0.008038 on the value of public service infrastructure

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand	2021	2020
53. Commitments		
Commitments in respect of capital expenditure		
Already contracted for but not provided for		
• Property, plant and equipment	224 209 116	149 613 493
• Investment property	1 264 208	37 093 847
	225 473 324	186 707 340
The capital expenditure will be financed from		
• Unspent conditional grants	36 829 318	149 864 919
• Own funding	188 644 006	36 842 421
	225 473 324	186 707 340

In the prior year, there were Commitments amounting to R878 603,80 which were erroneously excluded in the balance disclosed. The comparative amount has been restated accordingly.

All commitments include VAT.

Operating leases - as lessee (expense)

Minimum lease payments due		
- within one year	835 347	759 406

Operating lease payments represent rentals payable by the municipality for certain of its office properties. Leases are negotiated for an average term of three to five years and rentals are fixed for an average of three years. The lease agreements have escalations of 8% to 10% per annum. There were no renewal purchase options. No contingent rent is payable.

Operating leases - as lessor (income)

Minimum lease payments due		
- within one year	5 796 133	6 551 155
- in second to fifth year inclusive	16 530 796	24 851 432
- later than five years	31 028 880	28 786 575
	53 355 809	60 189 162

The entity leases various fixed properties under non-cancellable operating leases to various institutions. The lease agreements have escalations between 8 and 12% per year with the agreements varying between 2 to 50 years. Rental income, for these agreements, to the value of R 47,974,270 (2020: R 45,601,958) has been recognised in the Statement of Financial Performance during the year. Renewal options have been taken into account during the calculation of the deferred lease. There are no purchase options. There was no contingent rent during the year.

56. Change in estimate

Property, plant and equipment

For the following classes of PPE, the remaining useful lives were adjusted to a minimum remaining useful life of 3 years. The effect of the change has resulted in a decrease in depreciation of R82,058,046. It is impracticable to estimate the effect on future periods as the remaining useful lives is reviewed at each reporting date..

Asset Class	Depreciation (Before change in estimate)	Depreciation (After change in estimate)	Increase/ (Decrease) in Depreciation
Buildings	7 037 296	4 687 250	(2 350 046)
Community - Landfill sites & quarries	49 678 456	38 570 329	(11 108 126)
Community - Other	13 468 116	9 052 912	(4 415 205)
Infrastructure - Roads and roads related	164 533 135	114 530 002	(50 003 133)
Infrastructure - Sanitation	11 926 650	8 362 483	(3 564 168)
Infrastructure - Water	14 439 836	9 668 957	(4 770 879)
Fleet	7 762 205	5 170 802	(2 592 123)
Other property, plant and equipment	9 925 899	6 748 415	(3 177 484)
Intangible assets	230 225	153 343	(76 882)
	279 001 818	196 944 493	(82 058 046)

Furthermore, the Municipal entity changed its accounting estimates with respect to property, plant and equipment. In order to conform with the benchmark treatment of GRAP17, the residual values, estimated useful lives and depreciation method were reviewed at 30 June 2021. Adjustments to the useful lives affect the amount of depreciation for the current year and is expected to affect future periods as well.

The aggregate effect of the changes in accounting estimate on the financial statements for the year ended 30 June 2021 is as follows

Depreciation expense before remaining useful lives review	25 859 791
Future decrease in depreciation due to review	(4 668 747)
Depreciation expense after remaining useful lives review	21 191 044

56. Change in estimate (continued)

Consumer debtors

During the financial year the Valuation Appeal Board concluded on property rates value change for the University of the Free state. "The property value decreased from R 2.99 Billion to R 1.09 Billion as per the decision of the Appeal Board." This change is considered as change in estimate as per GRAP 3. The Effect of the change is as per Bellow:

Decrease: Revenue non-exchange transactions (Property Rates)	170 849 266
Decrease in Service charges - Sewerage and sanitation charges	29 631 368
Decrease in VAT Output	4 384 545
Decrease in Interest received from exchange transactions	23 539 914
Decrease in Consumer receivables from non-exchange transactions	(170 849 266)
Decrease in Consumer receivables from exchange transactions	(57 555 827)
	<u>-</u>

57. Prior period errors

Prior period errors were identified during the current year and corrected in line with GRAP 3 - Accounting Policies, Changes in Accounting Policies and Errors.

The correction of the error(s) relating to line items disclosed in the statements of financial position, performance and cash flow statement results in adjustments as follows:

1. Prior period error - VAT not previously claimed

During the current year it was noted that there were transactions in the previous years where VAT had not been claimed. The effect of the restatement is as follows:

Statement of financial position

Increase in VAT Receivable	-	12 876 819
Increase in Accumulated surplus	-	(12 575 375)
Decrease in Property plant and equipment - Buildings - WIP	-	(1 504)

Statement of financial performance

Decrease in Contracted services - Burial services	-	(9 315)
Decrease in Contracted services - Refuse removal services	-	(1 437)
Decrease in Contracted services - Business and advisory services	-	(6 846)
Decrease in Contracted services - Infrastructure and planning services	-	(1 071)
Decrease in Contracted services - Safeguard and security services'	-	(26 589)
Decrease in Contracted services - Legal costs	-	(72 964)
Decrease in Contracted services - Catering services	-	(2 303)
Decrease in Contracted services - Repairs and Maintenance	-	(123 112)
Decrease in Contracted services - Other contracted services	-	(4 035)
Decrease in General expenses - Animal Cost	-	(2 608)
Decrease in General expenses - Auditors remuneration	-	(4 849)
Decrease in General expenses - Bank charges	-	(3 798)
Decrease in General expenses - Consumables	-	(6 566)
Decrease in General expenses - Electricity	-	(30)
Decrease in General expenses - Fuel and Oil	-	(19)
Decrease in General expenses - Insurance	-	(3 279)
Decrease in General expenses - Operating Lease Expense	-	(197)
Decrease in General expenses - Postage and Courier	-	(1 223)
Decrease in General expenses - Printing and Stationary / Consumables	-	(6 253)
Decrease in General expenses - Uniforms and Protective Clothing	-	(15)
Decrease in General expenses - Royalties and License fees	-	(219)
Decrease in General expenses - Subscriptions and membership fees	-	(4)
Decrease in General expenses - Sundry Expenses	-	(6 502)
Decrease in General expenses - Telephone, fax and network charges	-	(15 858)
Decrease in General expenses - Travel and Subsistence	-	(848)

57. Prior period errors (continued)

2. Prior period error - Trade payables incorrectly accrued

During the current year, credit notes were issued on trade payables relating to the prior year(s) which had been erroneously captured. The effect of the restatement is as follows:

Statement of financial position

Decrease in VAT Receivables	-	(11 677)
Decrease in Payables from exchange transactions - Trade payables	-	7 330 038

Statement of financial performance

Decrease in Contracted services - Business and advisory services	-	(45 900)
Decrease in General expenses - Consumables	-	(31 943)
Increase in accumulated surplus	-	(7 240 518)
	-	-

3. Prior period error - Repairs and Maintenance expenditure incorrectly capitalised

During the current year expenditure relating to prior years for repairs and maintenance to property plant and equipment was identified which had been erroneously recognised as Work in progress (WIP). The effect of the adjustment is as follows:

Statement of financial position

Decrease in property, plant and equipment - Community WIP	-	(237 786)
Decrease in property, plant and equipment - Infrastructure - WIP	-	(4 806 035)

Statement of financial performance

Decrease in accumulated surplus	-	5 043 821
	-	-

4. Prior period error - Asset Accruals

During the current year it was noted that accruals created previously were not reversed when it was paid. The effect of the adjustment is as follows:

Statement of financial position

Increase in payables from exchange transactions - Retentions	-	23 653
Decrease in property, plant and equipment - Community WIP	-	(23 653)
	-	-

5. Prior period error - Correction of project T1531

Project T1531 was incorrectly capitalised from work in progress before completion date. The effect of the restatement is as follows:

Statement of financial position

Decrease in Property plant and equipment - Infrastructure - Roads and roads related - Cost	-	(26 848 318)
Increase in Property plant and equipment - Infrastructure - WIP	-	26 848 318
Decrease in Property plant and equipment - Infrastructure - Roads and roads related - Accumulated depreciation	-	137 219

Statement of financial performance

Decrease in Depreciation and amortisation - Property plant and equipment	-	(137 219)
	-	-

57. Prior period errors (continued)

6. Prior period error - Correction of project W1119 & W1510E

The costs to these projects were incorrectly capitalised from work in progress before completion date. For W1119 one-liner of 2019/2020 information was received and unbundled. The effect of the restatement is as follows:

Statement of financial position

Increase in Property plant and equipment - Infrastructure - WIP	-	226 955
Decrease in Property plant and equipment - Infrastructure - Sanitation network - Cost	-	(225 955)
Increase in Property plant and equipment - Infrastructure - Sanitation network - Accumulated depreciation	-	(368 536)

Statement of financial performance

Decrease in Contracted Services - Repairs and maintenance	-	(1 000)
Increase in Depreciation and amortisation - Property plant and equipment	-	368 536
	-	-

7. Prior period error - Correction of Naval hill costs

During the current year it was noted that maintenance related costs for the Naval hill had been incorrectly capitalised. Further, expenditure for the fencing of Naval Hill had not been capitalised. The effect of the adjustment is as follows:

Statement of financial position

Decrease in Property plant and equipment - Community - WIP	-	(1 033 001)
Decrease in accumulated surplus	-	1 033 001
Increase in Property plant and equipment - Community - Other - Cost	-	5 673 936
Increase in Property plant and equipment - Community - Other - Accumulated depreciation	-	(169 325)
Decrease in Property plant and equipment - Community - WIP	-	(5 673 936)

Statement of financial performance

Increase in depreciation and amortisation - property plant and equipment	-	169 325
	-	-

8. Prior period error - Capitalisation of W1803-1 & W103-2

During the prior year sufficient information was not provided to appropriately capitalise, calculate depreciation and derecognition on capital expenditure. Information was subsequently received the effect of the restatement is as follows:

Statement of financial position

Increase in Property plant and equipment - Infrastructure - Sanitation network - Cost	-	1 725 658
Decrease in Property plant and equipment - Infrastructure - Sanitation network - Accumulated depreciation	-	219
Increase in Payables from exchange transactions - Trade payables	-	(1 898 121)
Increase in VAT Receivables	-	247 581
Increase in Payables from exchange transactions - Retentions	-	(75 803)

Statement of financial performance

Increase in Loss on derecognition of assets and liabilities	-	279
Increase in depreciation and amortisation - property plant and equipment	-	187
	-	-

9. Prior period error - payments received in advance

During the current year payments received in advance relating to water consumer receivables were identified which were incorrectly classified in the prior year. The effect of the restatement is as follows:

Statement of financial position

Decrease in Payables from Non-exchange transactions - Payments received in advance	-	2 520 046
Decrease in Consumer receivables from exchange transactions - Water	-	(2 520 046)
	-	-

57. Prior period errors (continued)

10. Prior period error - Land not previously capitalised

During the current year, information was received from the Title Deeds office to confirm ownership of properties which belongs to the Municipality but had not been capitalised in the previous financial years.. The effect of the restatement is as follows:

Statement of financial position

Decrease in Inventory - unsold properties held for sale	-	(1 707)
Increase in Property plant and equipment - Land	-	2 400 000
Increase in Accumulated surplus	-	(2 398 293)
	-	-

11. Prior period error - Buildings misclassified as Work in progress

Civil structure of Naval hill cloakrooms completed in previous financial year which had been misclassified in the prior financial periods as work in progress. The effect of the restatement is as follows:

Statement of financial position

Increase in Property plant and equipment - Buildings - Cost	-	431 632
Increase in Property plant and equipment - Buildings - Accumulated depreciation	-	(26 187)
Decrease in Property plant and equipment - Buildings WIP	-	(431 631)
Decrease in Accumulated surplus	-	17 560

Statement of financial performance

Increase in Depreciation and amortisation - Property plant and equipment	-	8 626
	-	-

12. Prior period error - Fleet stolen or taken by the Sheriff

During the current year it was noted that property plant and equipment (Fleet) for the prior financial periods did not account for the fleet stolen and or taken by the sheriff. The effect of the restatement is as follows:

Statement of financial position

Decrease in Property plant and equipment - Fleet - Cost	-	(2 540 268)
Decrease in Property plant and equipment - Fleet - Accumulated depreciation	-	514 350
Decrease in Accumulated surplus	-	1 925 163

Statement of financial performance

Decrease in Depreciation and amortisation - Property plant and equipment	-	(67 981)
Increase in loss on derecognition of assets and liabilities	-	168 736
	-	-

13. Prior period error - Correction of BID 453: Media Costs

BID 453: Media cost was halted and discontinued in the prior year. The expenditure thereof was incorrectly classified as property plant and equipment - Community WIP. The effect of the restatement is as follows:

Statement of financial position

Decrease in Property plant and equipment - Community WIP	-	(30 989)
----------------------------------------------------------	---	----------

Statement of financial performance

Increase in General expenses - Printing and stationery	-	30 989

57. Prior period errors (continued)

14. Prior period error - Correction of project expenditures misclassified as Opex or Capex

During the current year it was noted expenditure for the following projects in the prior financial periods was either erroneously not capitalised or expensed: Project T1326D, Project T1305, C273/R1, Project W1502D and W1502E. The effect of the restatement is as follows:

Statement of financial position

Increase in Property plant and equipment - Infrastructure Road & roads related - Cost	-	1 178 101
Increase in Property plant and equipment - Infrastructure Road & roads related - Accumulated depreciation	-	(84 258)
Increase in payables from exchange transactions - Trade payables	-	(1 178 101)
Decrease in Accumulated surplus	-	7 333 234
Decrease in Property plant and equipment - Infrastructure WIP	-	(3 639 308)
Decrease in Property plant and equipment - Infrastructure WIP	-	(11 833 427)
Decrease in Property plant and equipment - Infrastructure WIP	-	(1 673 436)

Statement of financial performance

Increase in General expenses - Printing and stationery	-	54 529
Increase in Contracted services - Repairs and Maintenance	-	9 842 666

15. Prior period error - Prior year expenditure not accrued for

During the current year, payments were made for invoices relating to prior financial periods. These invoices had not been accrued for in the prior periods to which they relate to. The effect of the restatement is as follows:

Statement of financial position

Increase in VAT Receivables	-	1 457 910
Increase in payables from exchange transactions - Trade payables	-	(12 268 359)
Decrease in Accumulated surplus	-	99 456

Statement of financial performance

Increase in Finance costs - Trade and other payables	-	569
Increase in General expenses - Postage and courier	-	845 665
Increase in General expenses - Travel and Subsistence	-	24 375
Increase in General expenses - Workmen's compensation	-	238 212
Increase in General expenses - Printing and stationery	-	7 364
Increase in General expenses - Consumables	-	3 151
Increase in General expenses - Bursary to employees	-	24 030
Increase in General expenses - Sundry expenses	-	11 454
Increase in General expenses - Marketing & advertising	-	16 717
Increase in General expenses - Motor vehicle expenses	-	116 733
Increase in General expenses - Uniforms and protective clothing	-	90
Increase in General expenses - Telephone, fax and network charges	-	20 844
Increase in Contracted services - Repairs and maintenance	-	5 263 859
Increase in Contracted services - Legal costs	-	3 163 777
Increase in Contracted services - Burial services	-	11 240
Increase in Contracted services - Business and advisory services	-	959 903
Increase in Contracted services - electrical	-	3 010

16. Prior period error - Capitalisation of Fence at Klein Magasa Community hall

During the current year it was noted that fencing costs incurred in the prior financial years at Klein Magasa Community hall had not been capitalised when incurred. The effect of the restatement is as follows:

Statement of financial position

Increase in Property plant and equipment - Community - Other - Cost	-	116 989
Increase in Property plant and equipment - Community - Other - Accumulated depreciation	-	(6 326)
Decrease in Property plant and equipment - Infrastructure - WIP	-	(116 989)
Decrease in Accumulated surplus	-	464

Statement of financial performance

Increase in Depreciation and amortisation - Property plant and equipment	-	5 862

2020

57. Prior period errors (continued)

21. Prior period error - Deferred lease

During the current year, it was noted that contract periods were incorrectly accounted for while performing the deferred lease calculation. The effect of the restatement is as follows:

Statement of financial position

Decrease in Other receivables from exchange transactions - Deferred lease expenditure - (142 970)

Statement of financial performance

Decrease in Rental of facilities and equipment - Rental of facilities - 142 970

- -

22. Prior period error - Correction of Buildings WIP

During the current year, it was identified that there were costs relating to project W1412G PC6 which were incorrectly accrued for during the 2018/2019 financial year and the effect of the restatement is as follows:

Statement of financial position

Increase in property plant and equipment - Buildings WIP - 1 292 374

Increase in accumulated surplus - (1 292 374)

- -

23. Prior period error - Correction of Inventory - Water for distribution (in pipes and reservoirs)

During the current year, it was identified that there were inventory adjustments which were erroneously excluded during the incorporation of Naledi Local Municipality and the effect of the restatement is as follows:

Statement of financial position

Decrease in Inventory - Water for distribution (in pipes and reservoirs) - (83 434)

Decrease in accumulated surplus - 83 434

- -

24. Prior period error - Correction of Bloemwater payable

A settlement agreement was reached in the current year with regards to the Bloemwater amount outstanding amount. Consequently, the liability had been incorrectly recognised in the prior years. The effect of the restatement is as follows:

Statement of financial position

Increase in payables from exchange transactions - Trade payables - (226 220 219)

Increase in Accumulated surplus - 226 220 219

- -

25. Prior period error - Cash and cash equivalents

During the period under review it was noted that ACB payments relating to periods prior to the comparative year was incorrectly captured against the cash book and reflecting as a reconciling item. These transactions were investigated and it was determined that they should have been stopped and cancelled. A correction was made and the comparative statements for the 2019/20 financial year have been restated. The effect of the correction of the error(s) is summarised below:

Statement of financial position

Increase in cash and cash equivalents - 114 081

Statement of financial performance

Increase in opening accumulated surplus or deficit - (114 081)

- -

57. Prior period errors (continued)

26. Prior period error - Correction of Residual value calculations on Property plant and equipment - Fleet

During the current year, it was noted that there were residual values for Property plant and equipment - Fleet incorrectly calculated for the prior years. The effect of the restatement is as follows:

Statement of financial position

Decrease in Property Plant and Equipment - Fleet - Accumulated depreciation	-	2 652 913
Increase in Accumulated surplus	-	(723 828)

Statement of Financial Performance

Decrease in Depreciation and amortisation - Property plant and equipment	-	(1 167 555)
Decrease in Impairment loss or reversal of impairments	-	(761 530)
	-	-

27. Prior period error - Correction of Bulk Water purchases

During the current year, it was noted that there were errors in the calculation on the Bloemwater settlement amount in the prior year. The effect of the restatement is as follows:

Statement of financial performance

Increase of Bulk purchases - Water	-	451 418 007
Increase in Other income from exchange transactions - Settlement on supplier dispute	-	(451 418 007)
	-	-

28. Prior period error - Correction of Prior year Impairment on Consumer receivables

During the current year, it was noted that there calculation for the impairment of consumer receivables was incorrectly calculated in the prior year. The effect of the restatement is as follows:

Statement of financial position

Decrease in Consumer receivables from non-exchange transactions- Rates Impairment	-	24 399 514
Decrease in Consumer receivables from exchange transactions - Water impairment	-	9 324 043
Decrease in Consumer receivables from exchange transactions - Sewerage impairment	-	2 385 863
Decrease in Consumer receivables from exchange transactions - Refuse impairment	-	1 749 130
Increase in Other receivables from exchange transactions - Sundry Debtors impairment	-	(3 175 297)
Decrease in VAT Receivables	-	(1 054 621)
Decrease in Debt impairment and bad debt written-off	-	(33 628 632)
	-	-

29. Prior period error - Correction of prior year provision for Landfill sites and Quarries

During the current year it was noted the unwinding of the Provision for Landfill sites and Quarries was incorrectly calculated. The effect of the correction of the error(s) is summarised below:

Statement of financial position

Increase in Provisions - Rehabilitation of quarry sites	-	(49 748 724)
Decrease in Provisions - Rehabilitation of landfill sites	-	126 468 246
Decrease in Property plant and equipment - Community - Landfill sites and quarries - Cost	-	(13 165 942)
Increase in Property plant and equipment - Community - Landfill sites and quarries - Accumulated depreciation	-	(17 356 575)
Increase in Accumulated surplus	-	(38 019 654)

Statement of Financial performance

Increase Fair value adjustments: Community - Landfill sites and quarries	-	(25 533 926)
Increase in Depreciation - Property plant and equipment	-	17 356 575
	-	-

30. Prior period error - Debt impairment

During the period under review it was noted that government debt was excluded from the debt impairment provision in the current and prior years. The debt impairment methodology was revised to include impairment testing for government debt. A correction was made and the comparative statements for the 2019/20 financial year have been restated. The effect of the correction of the error(s) is summarised below:

59. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

This note presents information about the entity's exposure to each of the financial risks below and the entity's objectives, policies and processes for measuring and managing the financial risks. Further quantitative disclosures are included throughout the annual financial statements.

The Council has overall responsibility for the establishment and oversight of the entity's risk management framework.

The entity's audit committee oversees the monitoring of compliance with the entity's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the entity. The audit committee is assisted in its oversight role by the entity's internal audit function.

The entity monitors and manages the financial risks relating to the operations of the entity through internal risk reports which analyse exposures by degree and magnitude of risks.

The entity seeks to minimise the effects of these risks in accordance with the entity's policies approved by the Council. The policies provide written principals on interest rate risk, credit risk and the investment of excess liquidity.

Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The entity does not enter into or trade in financial instruments for speculative purposes.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions.

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2021	Less than 1 year	Between 1 and 2 years	Over 5 years
Borrowings	160 165 319	553 348 631	108 171 345

2020

59. Risk management (continued)

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2021	2020
Cash and cash equivalents	211 499 931	427 738 672
Consumer receivables from exchange transactions	1 663 015 028	1 399 938 143
Consumer receivables from non-exchange transactions	766 473 521	873 062 469
Other receivables from exchange transactions	167 972 020	138 573 538
Non-current receivables - at fair value	112 050	104 076
Non-current receivables - at amortised cost	633 074	901 756

The entity is exposed to a number of guarantees for housing loans to employees. Refer to note 53 for additional details.

These balances represent the maximum exposure to credit risk.

There has been no change, since the previous financial year, to the entity's exposure to credit risks or the manner in which it manages and measures the risks.

Market risk

Interest rate risk

Interest rate risk is defined as the risk that the fair value of future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest rate changes.

The entity's policy is to minimise interest rate cash flow risk exposures on long-term financing. Longer term borrowings are therefore usually at fixed rates.

At year end, the financial instruments exposed to interest rate risk were as follows:

- Call, notice and fixed deposits
- Development Bank of South Africa, Standard Bank of South Africa Limited and ABSA loans
- Finance lease obligations

The entity's interest rate risk arises from long-term borrowings and finance leases. Borrowings and finance leases issued at variable rates expose the entity to cash flow interest rate risk.

Borrowings and finance leases issued at fixed rates expose the entity to fair value interest rate risk. Entity policy is to maintain the majority of its borrowings and finance leases in fixed rate instruments. During 2020 and 2019, the entity's borrowings and finance leases at variable rate were denominated in the Rand.

Foreign exchange risk

The entity does not enter into significant foreign currency transactions and has had very limited exposure to foreign currency risk. The entity does not hedge foreign exchange fluctuations.

Price risk

The entity is exposed to equity securities price risk because of investments held by the entity and classified on the statement of financial position either as available-for-sale or at fair value through surplus or deficit. The entity is not exposed to commodity price risk.

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand

2021

2020

60. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

During the current year, the entity was placed under section 139(5)(a) & (c) of the Constitution due to financial constraints. A financial recovery plan has been put in place and is closely monitored by Provincial Government. Adjustments were made to the budget of the current and next three financial years to ensure that financial stability is reached and maintained.

We draw attention to the fact that at 30 June 2021, the municipality had an accumulated surplus of R 13 112 490 182 and that the municipality's total assets exceed its liabilities by R 18 200 735 162.

The entity had a surplus of R 7 106 063 (2020: surplus R 229 931 580) for the year. The current assets exceed the current liabilities by R (159 821 911) (2020: R (247 459 526)).

As disclosed in Note 15, the average repayment term of suppliers were 164 days and the Trade payables included an amount owed to the Bloemwater of R765 303 349 (2020: R 765 030 409) which was long overdue. These events or conditions, along with other matters as set forth in Note 60 indicate that a material uncertainty exists that may cast significant doubt on the entity's ability to continue as a going concern.

The entity incurred material water losses, refer to note 65 for further detail.

The entity provided for material impairments for receivables from exchange and non-exchange transactions, refer to notes 4, 5, 6 & 7 for further details.

The entity experienced a positive cash movement during the current year, refer to the Cash Flow Statement on page 9.

Management has assessed the impact of the COVID-19 pandemic through various means and the result of the assessment is that the entity continues as a going concern based on the income generation potential and also grant allocation from National Treasury.

61. Events after the reporting date

On the 4th of June 2021, there was a council resolution for the determination of a new sale of business agreement between the Centlec and Municipality. The agreement was to be implemented within 21 days however based on the legal and accounting implications, Council resolved to defer the implementation financial period of the resolution from 2020/21 to 2022/23 financial period.

62. Unauthorised expenditure

Opening balance as previously reported	3 879 282 210	2 404 106 970

65. Additional disclosure in terms of Municipal Finance Management Act (continued)

VAT

VAT payable	105 029 981	27 588 485
-------------	-------------	------------

VAT are shown in notes

All VAT returns have been submitted by the due date throughout the year.

Councillors' arrear consumer accounts

Refer to Appendix B for details relating to Councillors arrear debt.

Bulk water losses

The main reason for incurring water losses related to burst water pipes, leaks and unmetered sites.

The reason for the high increase in the cost per kilo-litre in the current year is due to the use of the drought tariff by Bloemwater.

	Kilo litres	Cost per Kilo litre	Total loss in Rands
2021	35 230 559	9.57	337 156 446
2020	22 126 702	9.99	221 045 754

Grants withheld

During the prior year, the following amount was withheld by National Treasury due to the slow implementation of projects. The amounts were subsequently forfeited.

Grant

Urban Settlement development grant	373 574 000	-
Public transport infrastructure and network systems grant	49 777 000	-
Integrated city development grant	77 000	-
Neighbourhood development grant	5 595 000	-
	429 023 000	-

Electricity distribution losses

	kWh - Units	Rand value	% Loss
2021	157 539 739	127 757 457	10,05 %
2020	182 694 562	138 776 833	8,04 %

For the 2020/21 financial year the distribution losses amount to 10.05% (2020: 8.04%). The annual electricity distribution losses are made up of technical and non-technical losses which are the difference between electricity purchased and electricity sold.

Non-technical losses:

Non-technical losses are amongst others the result of administrative and technical errors, negligence, theft of electricity, tampering with meters and connections which form part of illegal consumption, faulty meters, etc. Non-technical losses amounted to 52 513 246 kWh - units (2020: 42 585 819 kWh - units) with a Rand value of R 60 898 187 (2020: R 46 258 944).

Technical losses:

Technical losses are the result of electricity losses while being distributed from the source of generation through the transmission and distribution network to the final consumer. The wires (copper or aluminium) being used to distribute electricity have certain resistance which resist the throughput of current, as a result there is a certain portion of electricity that is lost due to distribution. Technical losses amounted to 105 026 493 kWh - units (2020: 85 171 638 kWh - units) with a Rand value of R 121 796 375 (2020: R 92 517 889).

66. Actual operating expenditure versus budgeted operating expenditure

Refer to Appendix D(2) for the comparison of actual operating expenditure versus budgeted expenditure.

2020

67. Actual capital expenditure versus budgeted capital expenditure

Refer to Appendix D(4) for the comparison of actual capital expenditure versus budgeted expenditure.

68. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the consolidated annual financial statements.

Deviations 2021

	Number of deviations	Rand value
Emergency	10	6 465 451
Sole supplier	32	7 408 441
Urgent	4	3 224 936
Other	14	482 375
	60	17 581 203

Deviations 2020

	Number of deviations	Rand value
Emergency	30	3 604 494
Sole supplier	8	1 462 788
Impractical	1	49 501
Other	12	318 043
	51	5 434 826

69. Budget differences

Material differences between budget and actual amounts

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand

2021

2020

69. Budget differences (continued)

Variance Explanations

The budget for Mangaung Metro municipality is prepared including its entity and not separating intercompany transactions while the Consolidated Annual Financial statements are prepared in compliance with GRAP 6, requiring elimination of intercompany transactions. As result, explanations for variances within the Consolidated Annual Financial statements will be focused on budget versus actual amounts net of intercompany transactions

The budget is approved on an accrual basis by nature of classification. The budget and the accounting bases are both on the accrual basis. The financial statements are prepared using the nature of expenses in the statement of financial performance. The approved budget covers the fiscal period from 1 July 2020 to 30 June 2021.

Changes from approved budget to final budget are the result of reallocations and shifting within the budget.

Basis for material differences between budget and actual amounts

It is general practice to deem a 5% or higher deviation on operational revenue and expenditure versus the final budget as material and for capital expenditure the percentage deviation is 5% or higher.

Financial Performance:

Property rates:

Higher than expected performance on Property rates due to more properties being billed for the period than budgeted and the number of new developments and supplementary valuation role.

Service charges:

Favourable variance due to estimates made on water accounts and cycles were partly completed during the national lockdown period. The negative impact of estimates on total water revenue were rectified during the month of June 2021 through journals on the billing system.

The variance can also be attributed to the impact of the lock down during which the KWH units sold dropped sales dropped as compared to the prior year. Other factors include the changes in the customers' consumption pattern as alternative cheaper sources of energy are becoming a norm in the country.

Other own revenue:

The unfavourable variance is due to the lack of the traffic management system for the administration of traffic fines and deficiencies in internal control measures.

Interest income received

During the budget preparation process there was an expectation that there was going to be a strict implementation of the credit control processes, thus there was likely to be a drop in the interest on the consumer receivables. However due to the impact of the COVID-19 lock down, the credit control processes were not effectively implemented and a number of customers accounts that were in arrears accumulated interest as there were no or slow payments during the lock down period.

Government grants & subsidies

The variance is due to the fact that the amount budgeted for included VAT while the actual amount recognized for the grant revenue excludes VAT.

Employee related costs:

The variance is mainly due to the absorption of interns, part time and temporary employees to permanent employees. There is a direct linkage between the unfilled vacancies and the overspending on overtime to date of R 185 million.

The variance can also be attributed to un-anticipated acting allowances that were paid during the year as posts became vacant. Other factors include overtime, provisions and allowances which are variable in nature.

Debt impairment:

Favourable variance due to improved debt collection within the municipality and also, the budget was prepared based on the prior debt impairment. The variance is due to the change in the impairment methodology which now includes impairment on government debt.

Depreciation and asset impairment:

Unfavourable variance due to insufficient budget for depreciation and also due to the underestimation of the depreciation and amortisation values which are influenced by condition assessment of individual assets at year end and the revaluation of assets at the end of the prior financial year.

Impairment loss/ Reversal of impairments

No budget is provided for impairment losses of this nature as they are unpredictable in nature since there is no pattern of such disasters in the history of the entity.

Materials and bulk purchases:

Unfavourable variance due to insufficient budget for water purchases.

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand

2021

2020

69. Budget differences (continued)

The variance is also attributed to an under provision for the bulk purchases budget during the adjustment budget process.

General Expenses

The variance is attributed to over provision on some of the individual line items in the general expenses category.

Loss on disposal of assets and liabilities

No auction due to Covid-19 lock down but items have been identified for disposal, auction to be held at the end of August 2021

Transfers recognised - Capital and Operational

The variance was mainly due to underspending on capital projects due to slow implementation of projects as well as the effect of the national lockdown due to the COVID-19 pandemic, this was further impacted by the surrendering of funds to NT

Capital expenditure:

Underspending on capital projects were due to slow implementation of projects as well as the effect of the national lockdown due to the COVID-19 pandemic.

Financial Position:

The variances are due to the impact of the over and under performance on revenue and expenditure items as indicated above under financial performance and capital expenditure.

Current Assets

The municipal entity does not budget for current portions of long term assets. The current portion as reflected on the face of the statement of financial position is budgeted for as part of the non-current assets.

Other receivables from exchange transactions

The unpredictable nature of the various line items that make up the total balance makes it impossible to prepare a reasonable budget.

Consumer debtors

The variance is mainly attributed to the effect of the various COVID-19 lockdowns when the credit control measures could not be implemented. A number of customers' accounts went into arrears during this period. The variance is also due to the change in the impairment methodology which now includes impairment on government debt.

Non-Current Assets

Intangible assets - The increase is due to more licenses being maintained and paid than in previous years

Deferred Tax - The variance is mainly attributed to the larger than anticipated taxable loss resulting in a large temporary tax difference.

Current Liabilities

The municipal entity does not budget for current portions of long term liabilities. The current portion as reflected on the face of the statement of financial position is budgeted for as port of the non-current liability.

Payables from exchange transactions - The variance is due to a number of factors namely accrued leave pay and electricity connections that could not be completed due to the effects of Covid 19.

Consumer deposits - The municipal entity's budgets assumption were that customers on rotational meters were to be converted to prepaid meters which could have resulted in a reduction in the consumer deposit. This assumption was affected by the COVID-19 lockdown.

Non-Current Liabilities

Deferred tax - The variance is mainly attributed to a larger than anticipated asset revaluation resulting in a large temporary tax difference.

Cash flow:

The variances are due to the impact of the over and under performance on revenue and expenditure items as indicated above under financial performance and capital expenditure.

70. Segment information

General information

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand

70. Segment information (continued)

Identification of segments

The municipality considers internal sources of information in identifying reportable segments. These include the IDP, SDBIP, Budget and monthly and quarterly reporting.

For management purposes, the municipality is organised and operates in nine key functional segments (or business units). To this end, management monitors the operating results of these segments for the purpose of making decisions about resource allocations and assessment of performance. Segments were aggregated for reporting purposes

Revenues and expenditures relating to these segments are allocated at a transactional level.

Aggregated segments

The municipality operates throughout the Free State Province. Segments were aggregated on the basis of services delivered as management considered that the economic characteristics of the segments throughout the Free State province were sufficiently similar to warrant aggregation.

The grouping of these segments is consistent with the functional classification of government activities which considers the nature of the services, the beneficiaries of such services and the fees charged for the services rendered (if any):

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services
Corporate Services	Provision of effective strategic leadership and management to Department. Ensures and oversees that all Directorates are provided with adequate support in line with the mandate, vision and mission of the municipality. It consists but not limited to Human Resources, Performance Management, Government communication and Information Management & Technology and Legal Services.
Finance	Finance department is charged with the responsibility of budget and treasury. It is also responsible for the financial wellness of the City including generating revenue and billing, maintaining financial records, Financial reporting and encourages responsible spending in terms of relevant legislations
Human Settlement & Housing	Human Settlement & Housing directorate is charged with the responsibility of developing and providing housing and dwellings for the residents of the city
Office of the City Manager	Office of the accounting officer where all the department heads report to. It ensures that structures and governance processes are in place and aligned to achieve the strategic objectives of the municipality in line with the relevant legislations.
Office of the Executive Mayor	Office of the Executive Mayor is a political head of the municipality appointed in terms of the Electoral Act. It ensures effective management of the city addressing agreed political priorities. It also ensures that citizens are given sufficient information, opportunity and encouragement to participate in and influence the affairs of the municipality.
Waste and Fleet management	Waste department manages and implements the collection of solid waste and cleaning of the City. Fleet management ensures that municipality has sufficient and appropriate fleet to ensure service delivery. These fleets are also managed and maintained through the department.
Engineering & Water Services	Engineering and Water departments are charged with developing and maintaining strategic infrastructure that mainly provides service delivery (e.g. Water, Sewer, refuse, etc.). The supply of water is also provided through the department.
Social & Public Safety	Social department is charged with the responsibility of improving the well-being of every individual in society so they can reach their full potential. Social development means investing in people (e.g. maintaining of parks, Zoo and museums, interactions, wellness and health). Public Safety is charged with the responsibility of keeping order in the City and ensuring compliance with relevant legislation (e.g. Criminal Procedures Act). Public Safety includes traffic department and law enforcement.
Planning, Economic and rural development Centlec (SOC) Ltd	Developing and Co-ordination of development and planning of the City and the implementation of strategies and policies aimed at improving service delivery, Structural and Economic development. The principal activity of the municipal entity is the distribution of electricity to industries, businesses and households mainly in the Mangaung and Southern Free State area

Mangaung Metropolitan Municipality

Consolidated Annual Financial Statements for the year ended 30 June 2021

Notes to the Consolidated Annual Financial Statements

Figures in Rand	2021	2020
71. Statutory receivables		
In accordance with the principles of GRAP 108, Statutory Receivables of the municipality are classified as follows:		
Taxes		
VAT Payables	105 029 981	27 588 485
	-	-
Consumer receivables from non-exchange transactions		
Rates	1 683 420 488	1 622 311 890
	-	-
Other receivables from non-exchange transactions		
Fines receivables	280 936 095	274 646 292
	-	-
Less: Provision for debt impairment	(1 196 932 795)	(1 023 495 443)
	-	-
Total Statutory receivables	872 453 769	901 051 224

Statutory receivables arises from the following legislation:

Taxes	- Value Added Tax Act (No 89 of 1991)
Rates	- Municipal Properties Rates Act (No6 of 2004)
Fines	- Criminal Procedures Act

Statutory receivables are initially measured at transaction value and subsequently at cost.

Interest received from statutory receivables

Rates	40 713 151	62 804 076
-------	------------	------------

Interest is levied at a rate determined by the Council on outstanding rates amounts.

Exemptions was taken for statutory receivables according to Directive 4 - Transitional provisions.

Refer to paragraph 1.11 of the Accounting policy for detailed information regarding the adoption of GRAP 108

Ageing

Refer to Note 4 of the Notes to the Financial statements for Ageing of Statutory receivables - Rates

Reconciliation on provision for debt impairment

Refer to Note 4 of the Notes to the Financial statements for the reconciliation on provision for debt impairment - Rates

Refer to Note 7 of the Notes to the Financial statements for the reconciliation on provision for debt impairment - Fines receivables

GRAP 108 implementation plan

The Municipality is in the second year of the transitional period and updated the fines receivable as per prior year annual financial statements, however, nothing more in adoption of GRAP 108 was done in the current financial year. The Municipality plans to be fully compliant in the next financial year.
