3. PURPOSE OF THE TARIFF POLICY

- 3.1 The purpose of this tariff policy is to prescribe the accounting and administrative policies and procedures relating to the determining and levying of tariffs by the Mangaung Metropolitan Municipality.
- 3.2 The Municipality should perform the procedures set out in this policy to ensure the effective planning and management of tariffs. In setting its annual tariffs the council shall at all times take due cognisance of the tariffs applicable elsewhere in the economic region, and of the impact which its own tariffs may have on local economic development.

4. SCOPE OF APPLICATION

- 4.1 This policy applies to all tariffs charged within the defined boundaries of Mangaung Metropolitan Municipality.

5. BASIC PRINCIPLES TO BE CONSIDERED IN DETERMINATION OF A TARIFF STRUCTURE

- 5.1 Service tariffs imposed by the Metropolitan Municipality shall be viewed as user charges and not as taxes, and therefore the ability of the relevant customer or user of the services to which such tariffs relate, shall not be considered as a relevant criterion (except in the case of the indigent relief measures approved by the Municipality from time to time).
- 5.2 The Municipality shall ensure that its tariffs are uniformly and fairly applied throughout the municipal region.
- 5.3 Tariffs for the three major services rendered by the Municipality, namely Water, Sewerage and Refuse charges, shall as far as possible recover the expenses associated with the rendering of each service concerned, and where feasible, generate a modest surplus as determined in each annual budget. Such surplus shall be applied in relief of property rates or for the future capital expansion of the service concerned, or both.
- 5.4 The tariff which a particular customer or user pays shall therefore be directly related to the standard of service received and the quantity of the particular service used or consumed.
- 5.5 The Municipality shall develop, approve and at least annually review an indigent support programme for the municipal area. This programme shall set out clearly the Municipality's cost recovery policy in respect of the tariffs which it levies on registered indigents, and the implications of such policy for the tariffs which it imposes on other users and customers in the municipal region.
- 5.6 In line with the principles embodied in the Constitution and in other legislation pertaining to local government, the Municipality may differentiate between different categories of users and customers in regard to the tariffs which it levies. Such differentiation shall however at all times be reasonable and shall be fully disclosed in each annual budget.
- 5.7 The Municipality's tariff policy shall be transparent, and the extent to which there is cross-subsidisation between categories of customers or users shall be evident to all customers or users of the service in question.

- 5.8 The Municipality further undertakes to ensure that its tariffs shall be easily explainable and understood by all customers and users affected by the tariff policy concerned.
- 5.9 The Municipality also undertakes to render its services cost effectively in order to ensure the best possible cost of service delivery.
- 5.10 In the case of conventional metering systems for water, the consumption of such service shall be properly metered by the Municipality and meters shall be read, wherever circumstances reasonably permit, on a monthly basis. The charges levied on customers shall be proportionate to the quantity of the service which they consume. In addition, the Municipality shall levy a monthly fixed charge for water services where applicable.
- 5.11 In adopting what is fundamentally a two-part tariff structure for water, namely a fixed basic charge coupled with a charge based on consumption, the Municipality believes that it is properly attending to the demands which both future expansion and variable demand cycles and other fluctuations will make on service delivery.
- 5.12 In case of vacant stands, where the services are available but not connected, the Municipality shall levy a monthly availability charge which is levied because of fixed costs such as the capital and maintenance costs and insurance of infra structure available for immediate connection.

6. FACTORS TO BE CONSIDERED IN THE DETERMINATION OF A TARIFF STRUCTURE

6.1 Financial Factors

- 6.1.1 The primary purpose of a tariff structure is to recover the actual costs of the rendering of a particular service to avoid cross subsidising of services.
- 6.1.2 In order to determine the tariffs which must be charged for the supply of the three major services, the Municipality shall identify all the costs of operation of the undertakings concerned, including specifically the following:-
- 6.1.2.1 Cost of bulk purchases in the case of water.
 - 6.1.2.2 Distribution costs.
 - 6.1.2.3 Distribution losses in the case of water.
 - 6.1.2.4 Depreciation expenses.
 - 6.1.2.5 Maintenance of infrastructure and other fixed assets.
 - 6.1.2.6 Cost of approved indigent relief measures and cross subsidising of low consumption.
 - 6.1.2.7 Administration and service costs, including: -
 - (a) service charges levied by other departments such as finance, human resources and legal services;

- (b) reasonable general overheads, such as the costs associated with the Office of the Municipal Manager;
- (c) adequate contributions to the provisions for bad debts and obsolescence of stock; and
- (d) all other ordinary operating expenses associated with the service concerned.

6.1.2.8 The intended surplus to be generated for the financial year. Surplus to be applied:-

- (a) as an appropriation to capital reserves; and/or
- (b) generally in relief of rates.

6.2 Socio-economic factors

6.2.1 Although the determination of tariffs is in many instances politically orientated, it ought to be based on sound, transparent and objective principles at all times. In order to fully understand the influence of the socio-economic factors the various user categories and forms of subsidisation needs to be considered. Tariffs should also support business initiatives aimed at creating jobs or contribute to the economy of the area.

6.2.2 Users can be divided into the following categories:-

6.2.2.1 Users who are incapable to make any contribution towards the consumption of services and who are fully subsidised;

6.2.2.2 Users who are able to afford a partial contribution and who are partially subsidised only; and

6.2.2.3 Users who can afford the cost of the services in total.

6.2.3 It is important to identify these categories and to plan the tariff structures accordingly. Subsidies currently derived from two sources namely: -

6.2.3.1 Contributions from National Government: National Government makes an annual contribution according to a formula, which is primarily based on information obtained from Statistics South Africa by means of census surveys. If this contribution is judiciously utilised it will subsidise all indigent households who qualify in terms of the Council policy.

6.2.3.2 Contributions from own funds: The Council can, if the contribution of National Government is insufficient, provide in its own operational budget for such support. Such action will in all probability result in increased tariffs for the larger users. Any subsidy must be made known publicly.

6.2.4 To make provision for subsidisation the tariff structure can be compiled as follow: -

6.2.4.1 Totally free services (within limits and guide lines).

6.2.4.2 Lower tariffs for users who qualify in terms of particular guide lines, for example to recover the operational costs of the service only; and

6.2.4.3 Full tariff payable with a subsidy that is transferable from sources as mentioned above.

6.3 Minimum service levels

6.3.1 It is important that minimum service levels be determined in order to make an affordable tariff package available to all potential users.

6.4 Credit Control

6.4.1 It is not possible to successfully compile a tariff structure without consideration of the stipulations of an effective credit control system. Income is provided for in the budget as if a 100% payment level will be maintained. It is therefore important to continuously ensure that users indeed pay punctually. Non payment has a direct effect in that provision for bad debt, in accordance with current payment levels, must be provided as expenditure in the budget.

6.4.2 However, it is also a fact that there are users who are unable to pay. Tariffs must therefore provide access to a minimum level of basic services for all users. It should furthermore be supplemented with a practical policy for indigents. This will ensure the sustainable delivery of services. In addition, adequate provision should be made on an annual basis for bad debt/ working capital in accordance with current payment levels.

6.5 Package of services

6.5.1 The accounts for rates and services must not be seen in isolation. It must be considered jointly to determine the most affordable amount that the different users can pay as a total account. The basic costs of a service must first of all be recovered and then only can surpluses be manipulated to determine the most economic package for the user with due allowance for future events in regard to a particular service.

6.6 Historical and future user patterns

6.6.1 It is important to keep accurate consumption statistics for the purpose of determining tariffs. Consumption determines tendencies, which ultimately have an influence on tariffs within a structure. Provision should be made in the process for growth and seasonal use, as well as for unforeseen events that may have an impact on tariffs.

6.7 User groups

6.7.1 Users are traditionally divided into user groups as set out below: -

6.7.1.1 Residential Properties;

6.7.1.2 Businesses and Commercial Properties;

6.7.1.3 Industrial Properties;

6.7.1.4 Agricultural Properties

6.7.1.5 Mining Properties

6.7.1.6 Public Service Purpose

6.7.1.7 Public benefit Organisations

6.7.1.8 Municipal Properties

6.7.1.9 Non Permitted Uses

6.7.1.10 Multi Purpose Properties

6.7.1.11 Accommodation establishments (including guest houses);

6.7.1.12 Municipal consumption (departmental charges);

6.7.1.13 Institutions that may be directly subsidised for example retirement homes, schools and hostels, sport organisations, etcetera; and

6.7.1.14 Special arrangements for specific developments as may be determined by Council from time to time.

6.7.2 A continuous effort should be made to group together those users who have more or less the same access to a specific service.

7. FREE BASIC SERVICES

7.1 Free basic municipal services refers to those municipal services necessary to ensure an acceptable and reasonable quality of life and which service, if not provided, could endanger public health or safety or the environment.

7.2 In terms of the South African Constitution all customers should have access to basic services. Currently, the free basic services provided to the domestic customers within the Mangaung Metropolitan Municipality are as follows: -

7.2.1 The extent of the monthly indigent support granted to indigent households must be based on budgetary allocations for a particular financial year and the tariffs determined for each financial year.

7.2.2 The general threshold for indigent support is restricted to qualifying households with a combined income amount determined by Council at the beginning of every financial year and will be applied for the duration of that particular financial year.

7.2.3 The Municipality recognises the following rates and service charges for indigent support:-

7.2.3.1 Electricity;

7.2.3.2 Water;

7.2.3.3 Refuse Charges

7.2.3.4 Sewerage/Sanitation;

7.2.3.5 Property Rates; and .

8. TARIFF STRUCTURES FOR VARIOUS SERVICES

8.1 It is essential that a compromise be reached between the following needs with the determination of a tariff structure: -

8.1.1 The need to reflect costs as accurately as possible in order to achieve cost effectiveness;

8.1.2 The need to ensure equality and fairness between user groups;

8.1.3 The need for a practically implementable tariff;

8.1.4 The need to use appropriate metering and provisioning technology;

8.1.5 The need for an understandable tariff; and

8.1.6 The user's ability to pay.

8.2 Taking into consideration the abovementioned points the tariff structure of the following services are discussed: -

8.2.1 Water.

8.2.2 Refuse Charges.

8.2.3 Sewerage/Sanitation.

8.2.4 Property Rates.

8.3 Water

8.3.1 Water is a scarce commodity with little alternatives available. Tariff structures should therefore be aimed at the reduction of consumption. In order to restrict consumption, an inclining block rate tariff structure with a basic fee is applied.

In principle, the amount that users pay for water services should generally be in proportion to their use of water services. Tariffs must be set at levels that facilitate the sustainability of the service.

8.3.2 To calculate the tariff for water, the actual cost incurred in the supply of water to the community, has to be taken into consideration. The principle of basic levies as well as a kilolitre tariff for water is determined by the cost structure.

8.3.3 Similar to electricity, this cost structure consists of the following components:-

8.3.3.1 Fixed costs: It represents that portion of expenses that must be incurred irrespective of the fact whether or not any water has been sold, for example the salary of staff who

have been appointed permanently with specific tasks relating to the provision of water, costs of capital and insurance that is payable in respect of the infrastructure. These costs must be recovered whether any water is used or not. The costs are therefore recovered by means of a fixed levy per period (normally as a monthly basic charge) in order to ensure that these costs are covered

8.3.3.2 Variable costs: It relates to the physical provision of water according to demand and must be financed by means of a unit tariff which is payable per kilolitre water consumed.

8.3.3.3 Profit taking: The tariffs for these services are determined in such a way that a NETT trading surplus is realised. Any trading surplus is used to subsidise the tariffs of rate funded services.

8.3.4 The following tariff structures were basically used for the determination of tariffs: -

8.3.4.1 Basic monthly charge (Rand per month). This will be applicable to any domestic/bulk/non-domestic as specified by the tariff schedule.

8.3.4.2 An availability fee will be charged on users and/or properties not connected to the water network, should it be available. This fee aims to recoup capital and maintenance costs of networks as well as certain fixed administrative costs in respect of such properties. If the owner connects and improve the property the debit will be adjusted pro-rata from the date of the connection.

8.3.4.3 Special tariff arrangements determined and approved by Council from time to time for specific developments and/or informal settlements.

8.3.4.4 Water structure is determined as follows:-

Residential

Step Tariffs

8.4 Refuse Charges

8.4.1 Refuse charges is an economic service and tariff calculations should be based on the actual cost incurred in delivering the service.

A customer who chooses to do his/her own refuse charges will still be liable for paying the applicable refuse tariff.

8.4.2 The tariff levied by Mangaung Metropolitan Municipality is based on the category of property as determined in the valuation roll.

8.4.3 The following tariff structures were basically used for the determination of tariffs:-

8.4.3.1 Residential (domestic customers) – maximum of one removal per week.

8.4.3.2 Flats/ Town Houses/ Duet Houses – maximum of one removal per week.

8.4.3.3 Business/ Commercial/ Industrial (Non – Bulk) – maximum of one removals per week.

8.4.3.4 Business/ Commercial/ Industrial (Bulk) – Individual arrangements as per trade waste tariffs

8.4.3.5 Special tariff arrangements determined and approved by Council from time to time for specific developments and/or informal settlements.
